conference in Mexico started mathematician Florin Diacu on an amazing journey to make sense of one of the strangest and if true most revolutionary theories you'll ever encounter. To understand how scientists could be sceptical about what year it is Florin Diacu explores the fascinating history of chronology from Egyptian horoscopes to the work of Isaac Newton with cameos by Voltaire and Edmund Halley making the startling discovery that our calendar is far from ironclad. It all depends rather on the dating of ancient events about which there is real controversy. At once accessible and profound *The Lost Millennium* examines the arguments of present day chronological revisionists such as the Russian scholar Anatoli Fomenko who claims that our system of dating is horribly askew. Fomenko cites evidence from ancient astronomy, linguistics and cartography and a crucial manuscript by Ptolemy staking his scientific prestige on a theory so controversial that it will change the way you think about time history and the calendar on your wall. The field has also inspired its share of now discredited cranks such as Immanuel Velikovsky a media celebrity of the 1950s. His notorious book *Worlds in Collision* argued that biblical events are incorrectly dated. Beautifully written and peopled with fascinating characters from past and present *The Lost Millennium* is essential reading for anyone who believes they're living in the year 2005. *The Month*, 1997
