- The need to share bandwidth. The need to move the office or migrate. The need to offer new services. All of these are often reasons to move to dynamic IP.
- Dynamic IP is the best choice for the following reasons:
  - It is the most cost effective. Because "IP address" is a valuable resource, dynamic IP is the most cost effective.
  - It is the most reliable. In static IP, if one IP address goes down, the entire network goes down. In dynamic IP, if one IP address goes down, the network continues to work.
  - It is the easiest to manage. In static IP, the administrator has to manually assign IP addresses to each device. In dynamic IP, the administrator can assign IP addresses to groups of devices.
