leaders It is also useful for world organizations IMF World Bank IFC etc working to create Jobs investigating economic crisis and allocating resources Students can benefit from this as it raises critical and novel and untouched areas in economics and management theories Economic scholars working on public policies should also find important aspects I intend to suggest that existing economic theories have inherent ontological epistemological as well as theoretical weaknesses that needs to be repaired and the real life problems must be examined within an interpretative framework of the law of management Ontology implicit or otherwise must be prioritized forming it as cornerstone of research methods assessments and questions This work shows that although capitalism and its various forms have been discussed in detail however few authors and philosophers have explored its relationship with management studies this conception has yet to be developed in detail This book emphasis is upon a constructive dialogue between engagement practice and philosophy as a perpetual process The book covers research snapshots and economic theories and ideas to the current date This book is unique and different from others in various aspects For example So far almost all of Gurus who contributed to the field of management unfortunately neglected the first part of the management chain i e capitalists input One reason could be lack of research funding Any business activity can be elaborated in terms of a chain comprising three prime components of management cycle Input process output 1 Investments with Capitalists input 2 Project or organization production phase process 3 Final product service output The significance of management theories to practice management is a widely discussed topic in conferences and journals but few have touched the shortcomings of management theories and models No one has pointed to the root cause of the issue and mostly discussed the other two segments of the management chain All of them expended efforts to fix and refine organizational issues as if they were mandated by the capitalists e g Taylor Chester Barnard and Elton Mayo etc Even Keynes is silent about sphere of investment decisions of the investors entrepreneur This still remains a lacuna in economics Marx critique mostly focused like others on the process production phase This work endeavor seeks to transform current economic theories into a more realistic and compatible discipline The fundamental issue explored in this book is to probe economic crisis from managerial perspective What kind of economic system to be built Would it be capitalist communist or socialist Why the economic theories have failed to deliver What is lacking in all economic theories So far management scholars have avoided such big questions In this context the task is to determine existing and historic relationship between management and capitalism Who is playing the Governance role Whether management is leading modern capitalism practices or modern capitalism is dictating managerial roles and responsibilities The trans disciplinary research strives to compile various disciplines long with theoretical analytical frameworks to produce new insights into management The aim of this thesis is to show understating of management and capitalism relationship and challenge their claims this is done by bringing in non western perspectives that make sense of history and human experience This work also describes change management and capitalism The salient contribution of my theory of capitalism is the consideration of management as a field for guidance and

control Often neglected is the visible hand of management to guide the invisible hand of price mechanism existing capitalist model is unregulated and seeks no government coercion Tiger Management Martin Hemmert,2012 The book analyzes the management of Korea firms from three different perspectives First a historical perspective is applied by showing how tiger management has emerged and how it has been continuosly advanced over the last fifty years etc **Industrial Management** ,1895 American Management Review ,1923
