## **Managing The Commons:**

**Managing the Commons, Second Edition** John A. Baden, Douglas S. Noonan, 1998-04-22 Garrett Hardin's seminal essay *The Tragedy of the Commons* appeared in 1968 and has been at the center of the debate on commonly owned ground or resources such as Western public grazing or the oceans. This is the second edition of a book exploring the issues raised in Hardin's essay. As scarce resources are increasingly strained, it is ever more crucial to identify those resources which are held in common and are therefore prone to tragic waste and abuses. The essays in this volume focus on alternate institutional approaches to managing these resources to prevent such tragedy. Governing the Commons Elinor Ostrom, 1990-11-30 Ostrom first describes three models most frequently used as the foundation for recommending state or market solutions.

**Managing the Commons** John A. Baden, Douglas S. Noonan, 2017-08-15 Managing natural resources that are held in common is a great and grave challenge. It requires addressing the community of users, beneficiaries, and managers. It also requires consideration of how those communities interact with the commons itself. At stake is the prosperity and even survival of both the people and the environment. Understanding and improving how we relate to commons has been the focus of much scholarly and practical research in the last 30 years. A quick look at the various natural resource commons surrounding us indicates that this will no doubt continue. Pacific Northwest salmon fisheries represent a system of commons both complex and illustrative. My past history as administrator of the US Environmental Protection Agency and my fisherman's interest in salmon has heightened my sensitivity to the plight of the salmon and the people whose lives they affect. Recently my wife and I moved back to the Pacific Northwest, something the salmon try to do every year as they live out their inspiring life cycles. Unlike us, the salmon do not always find a hospitable environment when they return. There are many reasons. Simply put, there are more people in the salmon's way, and they struggle more with the problems that come with expanding human populations. A number of reports issued over the past few years have chronicled the broad declines and local extinction of many salmon, steelhead, and sea-run cutthroat stocks in the region. The people who fish for a living and the communities in which they live have been hit hard. Our resource agencies are in danger of being overwhelmed by the complexity and magnitude of the problem. Why are salmon faring so poorly? Who is responsible? What can be done to reverse the recent declines in salmon populations? When tragedy befalls a commons, as it has the salmon, I come to no conclusion about who is at fault, and I don't intend to. The one thing that I am certain of is that the only truly innocent parties in all of this are the salmon and the generations of people yet to come. It seems to me that the responsibility falls upon all of us—fishermen, resource managers, and concerned citizens alike—to take the steps necessary to ensure that salmon populations recover to the point that our children will be able to enjoy the quality of life we once took for granted. While many people focus on how to get the most from commons, groups like the Sustainable Fisheries Foundation emphasize providing and maintaining those natural resources. Their goal is deceptively simple: We are trying to put more salmon back in the rivers and

lakes of the Pacific Northwest Determining exactly how to accomplish this goal has defied the efforts of a great many dedicated and talented people Many papers and panel discussions especially reports on the status and trend of wild salmon populations in the North Pacific make it clear that many salmon stocks in parts of the lower United States southern British Columbia and the west coast of Vancouver Island are not faring well The decline in salmon numbers in these areas corresponds with a rapidly expanding human population alterations in land and water use increasing sediment and containment loads and heavy fishing pressure by a combination of sport commercial and tribal groups

**Managing the Commons** John Baden, Douglas S. Noonan, 1998 The Future of the Commons Elinor Ostrom, Christina Chang, Mark Pennington, Vlad Tarko, 2012 This short book provides a brief introduction to the work of the late Elinor Ostrom 2009 Nobel Laureate in economics Her work is of vital importance in understanding how we can manage difficult environmental problems without top down government regulation As Professor Ostrom suggests examples such as European Union fisheries illustrate the difficulties of approaching the management of common pool resources with the mindset that government regulation can be a panacea The monograph features a lecture given by Elinor Ostrom just before she died as well as explanations of her work its relevance and practical examples by other eminent authors The authors help bring to life this crucial area of economics which is extremely important for all those with an interest in tackling environmental problems related to common pool resources This area is often ignored in mainstream economics textbooks but is of huge practical relevance in both developed and less developed countries

**Routledge Handbook of the Study of the Commons** Blake Hudson, Jonathan Rosenbloom, Dan Cole, 2019-01-04 The commons has come to mean many things to many people and the term is often used inconsistently The study of the commons has expanded dramatically since Garrett Hardin's *The Tragedy of the Commons* 1968 popularized the dilemma faced by users of common pool resources This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems

The Commons in the New Millennium Nives Dolsak, Elinor Ostrom, 2003-02-14 Globalization

**Governing tenure rights to commons** Food and Agriculture Organization of the United Nations, 2018-06-04 Governance of Tenure Technical Guide This guide aims to support states community based and civil society organizations the private sector and other actors in implementing the standards and recommendations of the Voluntary Guidelines on the Responsible Governance of Tenure The guide offers twelve strategies in three areas of action the legal recognition and protection of tenure rights to commons their effective implementation by states and rights holders alike and the support of communities to enjoy their rights

**Proleptic Leadership on the Commons** Randal Joy Thompson, 2020-10-22 Will capitalism give way to a commons centric society as many scholars and activists predict Viewing the commons as a vehicle for a new world order Randal Joy Thompson proposes proleptic leadership which envisions how leaders will continue to be essential as the custodians of responsible agency and conscious choice

**Global Perspectives on Long Term Community Resource Management** Ludomir R. Lozny, Thomas H. McGovern, 2019-06-21 Communal level resource management successes and failures comprise complex interactions that involve local regional and increasingly global scale political economic and environmental changes shown to have recurring patterns and trajectories The human past provides examples of long term millennial and century scale successes followed by undesired transitions collapse and rapid failure of collaborative management cooperation on the decadal scale Management of scarce resources and common properties presents a critical challenge for planners attempting to avoid the tragedy of the commons in this century Here anthropologists human ecologists archaeologists and environmental scientists discuss strategies for social well being in the context of diminishing resources and increasing competition The contributors in this volume revisit tragedy of the commons also referred to as drama or comedy of the commons and examine new data and theories to mitigate pressures and devise models for sustainable communal welfare and development They present twelve archaeological historic and ethnographic cases of user managed resources to demonstrate that very basic community level participatory governance can be a successful strategy to manage short term risk and benefits The book

connects past present future by presenting geographically and chronologically spaced out examples of communal level governance strategies and overviews of the current cutting edge research The lesson we learn from studying past responses to various ecological stresses is that we must not wait for a disaster to happen to react but must react to mitigate conditions for emerging disasters
