**First, Break All The Rules** Marcus Buckingham,Curt Coffman,1999-05-05 The greatest managers in the world seem to have little in common They differ in sex age and race They employ vastly different styles and focus on different goals Yet despite their differences great managers share one common trait They do not hesitate to break virtually every rule held sacred by conventional wisdom They do not believe that with enough training a person can achieve anything he sets his mind to They do not try to help people overcome their weaknesses They consistently disregard the golden rule And yes they even play favorites This amazing book explains why Marcus Buckingham and Curt Coffman of the Gallup Organization present the remarkable findings of their massive in depth study of great managers across a wide variety of situations Some were in leadership positions Others were front line supervisors

Some were in Fortune 500 companies others were key players in small entrepreneurial companies Whatever their situations the managers who ultimately became the focus of Gallup's research were invariably those who excelled at turning each employee's talent into performance In today's tight labor markets companies compete to find and keep the best employees using pay benefits promotions and training But these well intentioned efforts often miss the mark The front line manager is the key to attracting and retaining talented employees No matter how generous its pay or how renowned its training the company that lacks great front line managers will suffer Buckingham and Coffman explain how the best managers select an employee for talent rather than for skills or experience how they set expectations for him or her they define the right outcomes rather than the right steps how they motivate people they build on each person's unique strengths rather than trying to fix his weaknesses and finally how great managers develop people they find the right fit for each person not the next rung on the ladder And perhaps most important this research which initially generated thousands of different survey questions on the subject of employee opinion finally produced the twelve simple questions that work to distinguish the strongest departments of a company from all the rest This book is the first to present this essential measuring stick and to prove the link between employee opinions and productivity profit customer satisfaction and the rate of turnover There are vital performance and career lessons here for managers at every level and best of all the book shows you how to apply them to your own situation Managing People for the First Time Peter Stannack,1993 Specifically written to help those owners or managers about to recruit manage motivate and develop teams for the first time **Managing People for the First Time** ,2018 The First-Time Sales Manager Theodore G. Tyssen,1994 Salespeople are self determined self motivated and self reliant Creating a high performance team out of independent minded reps is challenge enough for an experienced manager but if it's your first time in the boss's seat the job can be overwhelming Tyssen covers special considerations of managing a sales force such as Hiring the right sales rep for the job Designing sales territories that can be efficiently and effectively managed Applying a personal touch even if your reps are a thousand miles away Ensuring everyone on the team delivers a consistent image and message Hosting sales conferences that will motivate and activate any sales force Coaching your sales force to achieve win win results Using plenty of sample forms and worksheets this guide will put any sales manager on track for success Development Management Justice Nyigma Bawole,Farhad Hossain,Asad K.

Ghalib,Christopher J. Rees,Aminu Mamman,2016-10-04 Despite significant financial investments the rate of development and pace of poverty reduction in developing and transitional countries has not always matched expectations Development management typically involves complex interactions between governmental and non governmental organisations donors and members of the public and can be difficult to navigate This volume brings together a group of international contributors to explore the theoretical and empirical underpinnings of development management and to consider the prospects and challenges associated with it in the context of both developing and transitional countries Referring to dominant norms and

values in public and developmental organisations development management is tied up with the attitudes and perceptions of various stakeholders including government officials public sector managers aid workers donors and members of the public Attempting to make sense of complex interactions between these actors is highly problematic and calls for new approaches models and insights Based on cutting edge research the chapters challenge much of the previous discourse on the subject and evaluate the challenges and opportunities that it presents Development Management offers academics researchers and practitioners of public administration business and management international development and political science a comprehensive and state of the art review of current research on development management in the context of developing and transitional countries *The New A-Z of Managing People* David Freemantle,1999 Essential practices for being a great boss whether one is responsible for supervising ten one hundred or 10 000 employees **Managing Knowledge** Paul Quintas,Tim Ray,Stephen Little,2002 This text offers a critical overview of underlying theory in this field as well as a range of relevant examples from a global perspective It places knowledge management in the context of an emerging global economy
