Managing The Health Care Professional:

Managing the Health Care Professional Charles R. McConnell,2004 Leadership Management Administration The Health Care Professional's Guide to Disease Management James B. Couch,1998 Disease Management Really Managing Health Care Valerie Iles,2005-11-16 Praise for the first edition Valerie Iles has such a sensitive no nonsense style that she easily succeeds in seducing the reader to accept her arguments about what is going so badly wrong with management in health care The case studies can only be described as gems But perhaps the greatest message this book can give to the NHS and health care managers in particular is that change is unstoppable All organisms must adapt with their environment or die Health Service Journal Yes This is a book that draws heavily on real life observations with an appropriate balance of theory and pragmatism It tackles the challenges we all face in our everyday work managing people change money ourselves and organisations Nursing Times anyone who has a part to play in managing health services would benefit from reading it British Medical Journal Much has been made of the distinction between management and leadership but in health care this separation is unhelpful Like the first edition this completely revised edition of Really Managing Health Care describes a model real management that brings the two elements together and demonstrates its application in health care settings Drawing on theory across a wide range of management disciplines and illustrating these with practical examples Valerie Iles succinctly answers three crucial questions How can I manage clinical professionals How can I increase the influence of my service What changes do I need to introduce to improve the quality of care my service is offering Written specifically for people suspicious of management jargon Really Managing Health Care is designed for service leaders from across health and social care and introduces ways of approaching the management task which recognize the particular dynamics of this field

Management Principles for Health Professionals Joan Gratto Liebler,Charles R. McConnell,2020-02-26 Management Principles for Health Professionals is a practical guide for new or future practicing healthcare managers The customary activities of the manager planning organizing decision making staffing motivating and budgeting are succinctly defined explained and presented with detailed examples drawn from a variety of health care settings Students will learn proven management concepts techniques models and tools for managing individuals or teams with skill and ease The Eighth Edition continues to present foundational principles of management in the context of contemporary health care With timely coverage of such topics as medical cost sharing use of robots ER by appointment increased use of observation units renewed use of flextime staffing and scheduling use of social media on the job and more this thoroughly updated text addresses the latest trends and issues that today s health care manager is likely to encounter **Knowledge Management for Health Care Procedures** David Riaño,2008-02-29 The incursion of information and communication technologies ICT in health care entails evident benefits at the levels of security and efficiency that improve not only the quality of life of the patients but also the quality of the work of the health care professionals and the costs of national health care systems Leaving research

approaches aside the analysis of ICT in health care shows an evolution from the initial interest in representing and storing health care data i.e. electronic health care records to the current interest of having remote access to electronic health care systems as for example HL7 initiatives or telemedicine. This sometimes imperceptible evolution can be interpreted as a new step of the progress path of health care informatics whose next emerging milestone is the convergence of current solutions with formal methods for health care knowledge management. In this sense K4CARE is a European project aiming at contributing to this progress path. It is centered on the idea that health care knowledge represented in a formal way may favor the treatment of home care patients in modern societies. The project highlights several aspects that are considered relevant to the evolution of medical informatics: health care knowledge production, health care knowledge integration, update and adaptation and health care intelligent systems.
