Checklist for Change Robert Zemsky, 2013-08-20 Almost every day American higher education is making news with a list of problems that includes the incoherent nature of the curriculum the resistance of the faculty to change and the influential role of the federal government both through major investments in student aid and intrusive policies Checklist for Change not only diagnoses these problems but also provides constructive recommendations for practical change Robert Zemsky details the complications that have impeded every credible reform intended to change American higher education He demythologizes such initiatives as the Morrill Act the GI Bill and the Higher Education Act of 1972 shedding new light on their origins and the ways they have shaped higher education in unanticipated and not commonly understood ways Next he addresses overly simplistic arguments about the causes of the problems we face and builds a convincing argument that well intentioned actions have combined to create the current mess for which everyone is to blame Using provocative case studies Zemsky describes the reforms being implemented at a few institutions with the hope that these might serve as harbingers of the kinds of change needed the University of Minnesota at Rochester's compact curriculum in the health sciences only Whittier College's emphasis on

learning outcomes and the University of Wisconsin Oshkosh's coherent overall curriculum. In conclusion, Zemsky describes the principal changes that must occur not singly but in combination. These include a fundamental recasting of federal financial aid, new mechanisms for better channeling the competition among colleges and universities, recasting the undergraduate curriculum, and a stronger, more collective faculty voice in governance that defines not why but how the enterprise must change.

Meeting the Challenges of Enterprise Risk Management in Higher Education John Mattie, 2007. In the summer of 2007, the Association of Governing Boards of Universities and Colleges (AGB) and the National Association of College and University Business Officers (NACUBO) held a summit on enterprise risk management (ERM) in Washington, DC, with senior officers and trustees from several leading colleges and universities. Approximately 40 leaders representing large and small as well as public and private institutions attended the event. The summit opened with a presentation on implementing ERM in the for-profit financial services industry. The next morning, the group heard four perspectives on risk management from a trustee, a chief risk officer (CRO), a president/CEO, and a chief business officer (CFO). After that, the group worked as a whole to develop a higher education-specific model. The objectives of the summit were to begin to develop a robust, sustainable ERM model for colleges and universities and to identify the appropriate ERM roles for presidents, CFOs, and other senior managers and trustees from large and small public and private institutions. This paper presents the results of the summit. Contains 1 chart and 7 footnotes.

Libraries as Vanguard of Community Service Provision in Shifting Information Landscapes Rabiya Ali Faridi, Collence Takaingenhamo Chisita, 2025-11-13. This edited collection presents insightful praxis-driven research on how libraries are responding to evolving trends in information and library sciences. The authors, experts from the fields of library and information science as well as related disciplines including sociology and communication technologies, examine key issues facing libraries, including budget constraints and resource allocation, changing user expectations, and emerging technologies. Utilizing a range of methodologies, including qualitative, mixed method, and quantitative approaches, contributors demystify the challenges facing modern libraries and offer practical solutions to help libraries thrive in a world of constant disruption.

Encyclopedia of Crisis Management K. Bradley Penuel, Matt Statler, Ryan Hagen, 2013-02-14. Although now a growing and respectable research field, crisis management as a formal area of study is relatively young, having emerged since the 1980s following a succession of such calamities as the Bhopal gas leak, Chernobyl nuclear accident, Space Shuttle Challenger loss, and Exxon Valdez oil spill. Analysis of organizational failures that caused such events helped drive the emerging field of crisis management. Simultaneously, the world has experienced a number of devastating natural disasters: Hurricane Katrina, the Japanese earthquake and tsunami, etc. From such crises, both human-induced and natural, we have learned our modern, tightly interconnected and interdependent society is simply more vulnerable to disruption than in the past. This interconnectedness is made possible in part by crisis management and increases our reliance upon it. As such, crisis management is as beneficial and crucial today as information

technology has become over the last few decades Crisis is varied and unavoidable While the examples highlighted above were extreme we see crisis every day within organizations governments businesses and the economy A true crisis differs from a routine emergency such as a water pipe bursting in the kitchen Per one definition it is associated with urgent high stakes challenges in which the outcomes can vary widely and are very negative at one end of the spectrum and will depend on the actions taken by those involved Successfully engaging dealing with and working through a crisis requires an understanding of options and tools for individual and joint decision making Our Encyclopedia of Crisis Management comprehensively overviews concepts and techniques for effectively assessing analyzing managing and resolving crises whether they be organizational business community or political From general theories and concepts exploring the meaning and causes of crisis to practical strategies and techniques relevant to crises of specific types crisis management is thoroughly explored Features the electronic version of this allows students to explore customized response plans for crises of various sorts Appendices also include a Resource Guide to classic books journals and internet resources in the field a Glossary and a vetted list of crisis management related degree programs crisis management conferences etc

Public Service Operations Management Zoe Radnor,Nicola Bateman,Ann Esain,Maneesh Kumar,Sharon Williams,David Upton,2015-07-30 How do policy makers and managers square the circle of increasing demand and expectations for the delivery and quality of services against a backdrop of reduced public funding from government and philanthropists Leaders executives and managers are increasingly focusing on service operations improvement In terms of research public services are immature within the discipline of operations management and existing knowledge is limited to government departments and large bureaucratic institutions Drawing on a range of theory and frameworks this book develops the research agenda and knowledge and understanding in public service operations management addressing the most pressing dilemmas faced by leaders executives and operations managers in the public services environment It offers a new empirical analysis of the impact of contextual factors including the migration of planning systems founded on MRP ERP and the adoption of industrial based improvement practices such as TQM lean thinking and Six Sigma This will be of interest to researchers educators and advanced students in public management service operations management health service management and public policy studies
