Total Value Development: How To Drive Service Innovation

Frank Montgomery Hull, Christopher David Storey, 2016-08-10 Total Value Development provides a framework to help businesses innovate and derive greater value from the services they offer. The secret is to devise an innovative model built on total value creation identified as the total value development TVD model. The TVD model has broad applicability for any large organization. Here case studies are presented showing the effectiveness of the TVD model in its practical application within companies. Statistical evidence is used to recommend improvements to performance outcomes such as time compression, cost reduction, quality, and innovation. Studies of over 100 service enterprises in the United States and the United Kingdom provide compelling evidence for benefits from business model innovation. Additional material in the form of guidance forms gives readers the tools needed for the implementation and recording of successful project value development. Providing both a practical framework and real life examples of adding value to current business practices, this book is essential reading for executives, managers, and researchers in the field of business and innovation.
