**Managing with Integrity** Charles E. Watson, 1991-05-23 Based on interviews with 125 CEOs of major U S corporations Watson shows how it is possible for a business person to succeed and be ethical at the same time He counters popular thinking about corporate America by presenting examples and anecdotes demonstrating how many executives tend to place what is ethical over what is expedient Watson examines the strategies these leaders employ in the face of myriad challenges to character encountered in the day to day business world ISBN 0 275 93865 4 126 25      Managing with Integrity Charles E. Watson, 1991-05-23 Based on interviews with 125 CEOs of major U S corporations Watson shows how it is possible for a business person to succeed and be ethical at the same time He counters popular thinking about corporate America by presenting examples and anecdotes demonstrating how many executives tend to place what is ethical over what is expedient Watson examines the strategies these leaders employ in the face of myriad challenges to character encountered in the day to day business world ISBN 0 275 93865 4 126 25      **Leadership Meta-Competencies** Dimitris Bourantas, Vasia Agapitou, 2016-04-22 This book doesn't offer overrated success stories which in most cases cannot be imitated It contains no check lists or recipes for success and it presents no theoretically based models The meta competencies discussed in this refreshing book are timeless virtues of which effective leaders seem to possess but which are rarely if ever included in lists of competencies in the vast business leadership literature They include Existential intelligence distinct from the much discussed emotional intelligence is about the ability to pose questions and reflect on fundamental issues in ways that develop a mature ability to interpret the world and better understand other people Phronesis is the ability to exercise sound judgement based on skilful application of moral and political rationality Solitude is a voluntary state achieved when an individual has the ability to momentarily withdraw and be free of external pressures and demands in order to concentrate on desired mental cognitive activities Trust building is more often discussed in leadership literature As a leadership competence it is about the ability to be credible show trust in and respect for other people and inspire trust For the curious business practitioner business student or business educator wishing to consider aspects of leadership competence that have to some extent been hidden or forgotten this book introduces the notion of meta competences and deals in detail with them      Fashion and Utopia in Management Thinking René ten Bos, 2000-09-15 Why is it that people in organizations seem to be so vulnerable to management fashion and guruism And why is it that both phenomena are loathed in traditional academic thinking about management and organization In this book Ren ten Bos argues for a more philosophical rather than scientific understanding of management fashion In doing so he questions the positivist and utopian orthodoxies that have pervaded management thinking Ten Bos contends that management fashion is a cultural phenomenon that deserves serious reflection not only because it is so immensely widespread but also because it seems to satisfy particular philosophical needs among its consumers Building upon some rather unusual sources in postmodern theory the author argues that management fashion

might encourage the practitioner to engage in philosophical self experimentation and to adopt alternative forms of understanding However it is also argued that management fashion often fails to keep up to this promise because it remains paradoxically incapable of laying off its rationalist cloak Ren ten Bos is a philosopher and management consultant He works for Schouten Nelissen and took his PhD at the Catholic University of Brabant **Executive E.
