*A Reference Grammar of Mandarin Chinese for English Speakers* Chauncey Cheng-hsi Chu, 1984 This reference grammar provides a description of Mandarin Chinese in familiar terms and enables the English speaking reader to transfer his/her knowledge of English to the study of Chinese Many of the unique features of the language are treated through a comparison with semantically corresponding though syntactically different features in English Aside from the conventional types of sentences special constructions are amply explained and illustrated for the reader Understanding the specific meaning of each of these constructions is one of the central themes of the grammar This book contains a number of original analyses such as that of the shi de construction and the notion of continuum for the indiscrete nature of linguistic structure which should serve as a valuable reference source for both the language teacher and the profession of Chinese linguistics

### **An Introduction to Government-binding**

**Theory in Chinese Syntax** Yuanjian He, 1996 One of the major concerns of current linguistic theory is to determine the set of general principles to which the syntactic structure of all natural languages conforms and in this connection it is important to examine a variety of language families and types Though since the 1980s current linguistic theories such as the government binding theory have been applied to Chinese this volume takes up issues to which previous investigations did not pay much attention or gave less comprehensive treatment Its analysis of many aspects of Chinese syntax based on careful examination of data should be of interest and value to Chinese linguists whether G B oriented or otherwise

### **Corpora in**

**Interpreting Studies** Andrew K.F. Cheung, Kanglong Liu, Riccardo Moratto, 2023-12-01 Cheung Liu Moratto and their contributors examine how corpora can be effectively harnessed to benefit interpreting practice and research in East Asian settings In comparison to the achievements made in the field of corpus based translation studies the use of corpora in interpreting is not comparable in terms of scope methods and agenda One of the predicaments that hampers this line of inquiry is the lack of systematic corpora to document spoken language This issue is even more pronounced when dealing with East Asian languages such as Chinese Japanese and Korean which are typologically different from European languages As language plays a pivotal role in interpreting research the use of corpora in interpreting within East Asian contexts has its own distinct characteristics as well as methodological constraints and concerns However it also generates new insights and findings that can significantly advance this research field A valuable resource for scholars of scholars focusing on corpus interpreting particularly those dealing with East Asian languages
