**An International Psychology of Men** Chris Blazina, David S. Shen-Miller, 2011-01-19 This text is the first to provide a contextual understanding of the clinical issues that affect men and masculinity across a wide range of cultural and national settings. It demonstrates that gender can no longer be viewed as an isolated characteristic in an era of increased globalization. Mental health professionals need to take ethnic and cultural issues into account to provide adequate care for male patients. Numerous international perspectives are offered by the contributing authors, authorities from countries such as Australia, Argentina, Denmark, Canada, India, Ireland, and South Africa, on theoretical and clinical innovations for working with men. Their chapters also offer insight into the socio-cultural contexts for counseling men in and from their respective countries by exploring the ways in which being a man is socially defined, what unique challenges men face, and how these challenges can be negotiated within their specific cultural settings. Topics addressed will include boyhood, notions of manhood, relationship concerns, and power, fatherhood, and men's body image across the life span. This text will ultimately enable mental health practitioners to have a better understanding of how to work more effectively with male clients.

*Understanding Homicide* Fiona Brookman, 2005-02-16 *Understanding Homicide* is a comprehensive and challenging text unravelling the phenomenon of homicide. The author combines original analysis with a lucid overview of the key theories and debates in the study of homicide and violence. In introducing the broad spectrum of different features, aspects, and forms of homicide, Fiona Brookman examines its patterns and trends, how it may be explained, its investigation, and how it may be prevented. The book is unique in its focus, coverage, and style, and bridges a major gap in criminological literature. While focused in several respects upon the UK experience of homicide, the text necessarily draws upon and makes a significant contribution to international literature, research, and debate.

**Understanding Homicide** Fiona Brookman, 2021-11-24 In this engaging and accessible book, Brookman draws upon several decades of her own research on homicide and violence, including ethnographic research on homicide investigation in the UK and USA, and interviews with violent offenders, in order to unravel the characteristics and causes of homicide, how police and forensic scientists investigate it, and how it can be prevented. Synthesising bespoke new analysis of the Home Office Homicide Index with case studies of homicides and international debate and literature, this comprehensive textbook will be a valuable resource for students studying homicide, violence, its investigation, and responses to it, as well as researchers and practitioners interested in homicide and violence.

**The American Middle Class** Robert S. Rycroft, 2017-05-12 What is the American Dream? This book's author argues that, contrary to what many believe, it is not achieving the wealth necessary to enter the top one percent, but rather becoming members of the great middle class by dint of hard work and self-discipline. Americans of all classes consider themselves to be middle class. There are Americans who, by any objective standard, should be considered poor, who would insist they are middle class, just as other Americans who should be considered wealthy also insist they are middle class. Thinking of yourself and

being thought of by others as middle class is the American Dream for tens of millions of people But an enduring problem of the American middle class is the worry that the Dream is coming apart that forces are lurking in the shadows waiting to steal their progress and throw them back into poverty This thought provoking reference explores a disparate multitude of issues associated with being middle class in America It addresses a range of questions and subtopics including the meaning of the term middle class how middle class status is expressed by both the majority and the various minorities that make up the American mosaic what economic pressures are bearing down on the middle class and how economists and others attempt to make sense of the economic issues of the day Readers will also better understand how political institutions and public policies are shaping the way the middle class views the world how labor housing education and crime related issues have influenced the development and growth of the middle class the norms of the middle class versus those of other classes in society and the role of culture and media in shaping how members of the middle class view themselves and how they are viewed by others This two volume set provides a comprehensive look at the American middle class that supports student research in economics social studies cultural studies and political history The content supports teachers in their development of lesson plans and assignments that directly align with the Common Core State Standards and the recommendations of the National Curriculum Standards for Social Studies NCSS with respect to all ten NCSS themes Asian Genders in Tourism

Catheryn Khoo-Lattimore, Paolo Mura, 2016-09-15 While gender research in tourism has become increasingly important within Western academic circles little has been written from an Asian perspective This book is the first to address this knowledge gap and to fully explore Asian gendered identities and tourism The chapters reflect upon the role of tourism in producing reiterating and resisting existing gendered structures of power in Asia The authors attempt to reconcile both Asian and Western perspectives on gender using their own personal experiences of understanding and negotiating Western and Asian identities and practices The book paves the way for important reflections about the ontological and epistemological meanings of Asia gender and tourism It is an important resource for researchers from a range of disciplines including tourism leisure studies Asian studies and feminist and gender studies as well as for professionals working in the tourism industry

**Reconciling Indonesia** Birgit Bräuchler, 2009-09-10 Indonesia has been torn by massive internal conflicts over the last decade The absence of functioning national tools of reconciliation and the often limited success of an internationally established reconciliation toolkit of truth commissions and law enforcement justice and human rights forgiveness and amnesty requires us to interrogate commonly held notions of reconciliation and transitional justice Reconciling Indonesia fills two major gaps in the literature on Indonesia and peace and conflict studies more generally the neglect of grassroots agency for peace and the often overlooked collective and cultural dimension of reconciliation Bringing together scholars from all over the world this volume draws upon multi disciplinary theoretical perspectives extensive fieldwork and activists experience and explores the ways in which reconciliation connects with issues like civil society gender religion tradition

culture education history displacement and performance It covers different areas of Indonesia from Aceh in the West to the Moluccas in the East and deals with a broad variety of conflicts and violence such as communal violence terrorist attacks secessionist conflicts localized small scale conflicts and the mass violence of 1965 66 Reconciling Indonesia offers new understandings of grassroots or bottom up reconciliation approaches and thus goes beyond prevalent political and legal approaches to reconciliation Reconciling Indonesia is important reading for scholars activists and anyone interested in current developments in Indonesia and the broader region and in new approaches to peace and conflict research **Annual Meeting Program** American Educational Research Association,2002 Aanwinsten van de Centrale Bibliotheek (Queteletfonds) Bibliothèque centrale (Fonds Quetelet),2002 **International Guide to Literature on Masculinity** Diederik F. Janssen,2008 International in scope this guide lists references by world region selected nations selected American ethnic minorities and Christianity and Judaism Specific ethnic minorities covered include American Indians African Americans and Asian Americans **The Security-development Nexus** Lars Buur,Steffen Jensen,Finn Stepputat,2007 The link between security and development has been rediscovered after 9 11 by a broad range of scholars Focusing on Southern Africa the Security Development Nexus shows that the much debated linkage is by no means a recent invention Rather the security development linkage has been an important element of the state policies of colonial as well as post colonial regimes during the Cold War and it seems to be prospering in new configurations under the present wave of democratic transitions Contributors focus on a variety of contexts from South Africa Mozambique and Namibia to Zimbabwe and Democratic Congo they explore the nexus and our understanding of security and development through the prism of peace keeping interventions community policing human rights gender land contests squatters nation and state building social movements DDR programmes and the different trajectories democratization has taken in different parts of the region **Humanities Index** ,2002 **Forthcoming Books** Rose Arny,2003 **Subject Guide to Books in Print** ,2001 *Proceedings* ,2006 **The Encyclopedia of Social Work** Terry Mizrahi,Larry Davis,2008-04-24 This 20e contains 400 articles which represent a thoroughly updated and expanded look at the entire field of social work The 4 volumes cover all aspects of social work from practice interventions social environments social conditions and challenges to social policy and history Co published by OUP and the National Assoc of Social Workers USA **The Psychologist** ,2003 **In the Room with Men** Matt Englar-Carlson,Mark A. Stevens,2006 In the Room With Men explores theories of masculinities current research on the psychology of men and how these ideas are applied in clinical practice Men enter therapy less frequently than women and when they do therapy can be quite different than it is with women clients To work with men successfully therapists must be aware of these differences and often must adjust their approach Although a growing amount of research addresses the mental health issues that men face it is hard to find anything in the literature documenting the experiences of therapists working with men or ways to tailor therapy to their unique needs The contributing authors of this volume remedy this

situation by bringing readers into the counseling room with their male clients and describing their personal views about and their particular approach to working with men At the heart of each chapter is a case narrative giving readers a hands on feel for how therapy works with male clients and insight into how and why therapists make certain clinical decisions backgrounds and in so doing highlight how notions of masculinity intersect with other aspects of culture Over the course of the volume these case examples and discussions paint a clear picture of the clinical realities of working with men Featuring empirical discussions throughout the volume as well as a comprehensive theory and literature survey *In the Room With Men* effectively combines research theory and actual practice making this a must have resource for all mental health practitioners
