Liesel Ashley Ritchie,Wayne

MacDonald,2010-07-13 The first principle of humanitarian assistance is do no harm The second might be do better Enter the evaluation of emergency and disaster management This issue consolidates reflections from evaluation practices in disaster and emergency management A number of important themes are addressed systemic assessment of needs interagency coordination evaluation of responses in real time evaluation in international and national jurisdictions Chapters discuss where the evaluation of humanitarian practice and emergency and disaster management currently stands and where it should be going Our humanitarian impulse as in the aftermaths of the Rwandan genocide Hurricane Katrina the Indian Ocean tsunami and the January 2010 earthquake in Haiti is an enduring quality The route from donor to affected population is long and varied When sudden unprecedeted needs are juxtaposed with expectional levels of charitable responses the question is whether the responses were good enough Did supply meet demand Was it the right thing Was it done well Who received support Was it appropriate Was the timing right Can it be improved All are questions for evaluation For populations traumatized by disaster the answers have consequences for protection for restoration of individual and community efficacy and ultimately for hope and dignity This is the 126th volume of the volume of the Jossey Bass quarterly report series New Directions for Evaluation an official publication of the American Evaluation Association *A Guide to Whole-school Evaluation - Management Leadership and Learning in Primary Schools* Ireland.
