## **Managing Nuclear Operations:**

Managing Nuclear Operations Ashton B. Carter, John D. Steinbruner, 1987      **Managing U.S. Nuclear Operations in the 21st Century** Charles Glaser, Austin Long, Brian Radzinsky, 2022-10-04 Exploring how the United States manages its still powerful nuclear arsenal Arms control agreements and the end of the Cold War have made the prospect of nuclear war a distant fear for the general public But the United States and its principal rivals China and Russia still maintain sizable arsenals of nuclear weapons along with the systems for managing them and using them if that terrible day ever comes *Managing U S Nuclear Operations in the 21st Century* focuses on how theories and policies are put into practice in managing nuclear forces in the United States It addresses such questions as What have been the guiding priorities of U S nuclear strategy since the end of the Cold War What nuclear attack options would the president have during a war How are these war plans developed and reviewed by civilian and military leaders How would presidential orders be conveyed to the uniformed men and women who are entrusted with U S nuclear weapons systems And are these communications systems and supporting capabilities vulnerable to disruption or attack The answers to such questions depend on the process by which national strategy for nuclear deterrence developed by civilian leaders is converted into nuclear war plans and the entire range of procedures for implementing those plans if necessary The chapter authors have extensive experience in government the armed forces and the analytic community Drawing on their firsthand knowledge as well as the public record they provide unique authoritative accounts of how the United States manages its nuclear forces today This book will be of interest to the national security community particularly younger experts who did not grow up in the nuclear centric milieu of the Cold War Any national security analyst professional or government staffer seeking to learn more about nuclear modernization policy and the U S nuclear arsenal should be interested in this book It should also be of interest to professors and students who want a deep understanding of U S nuclear policy      **Managing Nuclear Operations** Ashton B. Carter, 1987      **Managing Nuclear Operations** Ashton B. Carter, 1987 This volume a joint project of the Brookings Institution and Harvard University's Center for Science and International Affairs analyzes the dynamics of nuclear operations and the vital policy problems they pose Twenty two experts ranging from a former commander in chief of the Strategic Air Command to an expert in radar technology discuss peace time safety and control of nuclear weapons worldwide and the means for terminating nuclear war before it escalates to all out exchanges They also describe command posts warning sensors communication technologies locking devices to prevent unauthorized explosion of nuclear weapons selection of nuclear targets and the exercise of political authority over nuclear operations ISBN 0 8157 1313 4 pbk 18 95      *Energy Abstracts for Policy Analysis* , 1987-07

**Thinking about the Unthinkable in a Highly Proliferated World** Clark Murdock, Thomas Karako, 2016-08-05 For decades the United States has led the effort to stem the spread of nuclear weapons both among potential adversaries and among its allies and partners The current state of deterrence and of the nonproliferation regime however is open to many

doubts What happens if the nonproliferation regime should break down altogether What happens if extended deterrence should fail and allies no longer believe in the credibility of the U S nuclear umbrella What happens when the world has not 9 but 11 15 18 or even more nuclear powers This study explores how such a world might function and what it would mean for our present conceptions of deterrence for the place of the United States in the international order and for international order itself

The Fragile Balance of Terror Vipin Narang, Scott D. Sagan, 2023-01-15 In The Fragile Balance of Terror the foremost experts on nuclear policy and strategy offer insight into an era rife with more nuclear powers Some of these new powers suffer domestic instability others are led by pathological personalist dictators and many are situated in highly unstable regions of the world a volatile mix of variables The increasing fragility of deterrence in the twenty first century is created by a confluence of forces military technologies that create vulnerable arsenals a novel information ecosystem that rapidly transmits both information and misinformation nuclear rivalries that include three or more nuclear powers and dictatorial decision making that encourages rash choices The nuclear threats posed by India Pakistan Iran and North Korea are thus fraught with danger The Fragile Balance of Terror edited by Vipin Narang and Scott D Sagan brings together a diverse collection of rigorous and creative scholars who analyze how the nuclear landscape is changing for the worse Scholars pundits and policymakers who think that the spread of nuclear weapons can create stable forms of nuclear deterrence in the future will be forced to think again Contributors Giles David Arceneaux Mark S Bell Christopher Clary Peter D Feaver Jeffrey Lewis Rose McDermott Nicholas L Miller Vipin Narang Ankit Panda Scott D Sagan Caitlin Talmadge Heather Williams Amy Zegart

RAOP, 1989 **The Utility of De-escalatory Confidence-building Measures** Joseph E. Nation, Rand Corporation, 1989 In times of crisis between the United States and the Soviet Union certain actions may exhibit non aggressive or draw down intentions thereby lessening the potential for escalating conflict This paper evaluates a variety of these confidence building measures CBMs to determine their political and military costs Four of the measures seem viable

- 1 the return of civilian leaders from emergency locations
- 2 the termination of interference with communications and national technical means of verification
- 3 the cessation of civil defense measures and
- 4 the phased return of bombers to main operating bases

**Nuclear Strategizing** Stephen J. Cimbala, 1988-08-03 Challenging much of the conventional and established approaches to deterrence and crisis management Cimbala suggests that a decisionmaker in a crisis situation attempts to cope with a developing situation rather than rationally consider predetermined options ISBN 0 275 92987 6 39 95

Security and Arms Control: A guide to international policymaking Edward A. Kolodziej, Patrick M. Morgan, 1989 This two volume comprehensive guide is organized around the assumption that national and international security and arms control studies are interdisciplinary in nature Volume 2 clarifies and defines selected current issues and problems from an international perspective The chapters look at the scope of the emerging field of security and arms control studies as a serious field of systematic inquiry they serve as a critical review and evaluation of the most important literature within each sub field The chapters identify major problems key concepts methods disciplinary approaches intellectual styles and data sources Security and Arms Control Volume 2 is organized by sub field First contending contemporary perspectives on the international system itself as the source of conflict and war are presented The various facets of nuclear deterrence including implications for the possible use of nuclear weapons follow The focus then shifts to conventional military power in the system including arms transfers The incidence of subconventional or low intensity conflicts including the practice of and possible responses to terrorism is analyzed The book concludes with strategic arms control nuclear proliferation and the study of crisis decision making Security and Arms Control Volume 2 can be used as a text as well as serving as a valuable guide to the study of international and national security and arms control Interested students and policy makers will find valuable material for their studies and research

**First Strike Stability** Stephen J. Cimbala, 1990-08-24 The lifting of the Iron Curtain in response to pressures for democratic reform in the Eastern Bloc nations and the refusal of General Secretary Mikhail Gorbachev to use the Red Army to police countries of the Warsaw Pact have led to a radically changed international environment Preceded by over 40 years of peace and stability unprecedented in the history of modern Europe the Cold War ended in a climate of upheaval and uncertainty This volume addresses issues associated with the political and military vacuum created by recent events and explores in depth a problem of military uncertainty first strike stability Stephen J

Cimbala argues that war in a system undergoing rapid change including reductions in forces and political realignment remains disturbingly possible due to the unforeseeable inadvertent and uncontrollable uncertainties that plague decision making and military planning in Washington Moscow and other international power centers hence first strike instability This timely volume clarifies the kind of bargain superpowers and their allies have made in regard to nuclear weapons and command systems Cimbala provides enhanced understandings of the concept and practice of nuclear deterrence and of first strike stability in a post Cold War world that can help direct arms control efforts toward those areas that are most important to actual security Broad aspects of the problem of first strike stability are set forth in the first chapter which also anticipates some of the connections between political and military levels of analysis discussed in the conclusion Chapter two introduces the concepts of the state of nature and the state of war explains how they apply to the problem of first strike stability and why the possibility of war including nuclear war cannot be excluded Chapter three focuses on the New Soviet Thinking and why the probability of accidental and inadvertent war and escalation is not affected by reducing the levels of armaments alone Chapter four emphasizes the problems facing the United States and NATO and the approaches to escalation control which NATO assumes will be implemented should deterrence fail The results of the theoretical and administrative confusion over approaches to escalation control outlined in chapter four reappear in chapter five in the form of problems for war termination The controversial issue of eliminating nuclear deterrence with emphasis on the proposal for elimination by preclusive antinuclear strategic defenses is the focus of chapter six The final chapter reviews the implications of the preceding chapters and arrives at some startling conclusions Scholars and students of military affairs political scientists government officials and members of the military establishment will find the up to the minute information and judgements contained in First Strike Stability invaluable aids to their own decision making on this profoundly important world issue

Foundation for the Future Matthew Bunn, 1990      Conflict Termination in Europe Stephen J. Cimbala, 1990-10-30 An important contribution to the international relations and military studies literature this study considers the problem of conflict termination in Europe an area of immense strategic importance to both the United States and the Soviet Union The author argues that a well thought out policy for conflict termination is lacking within the NATO alliance which currently relies almost exclusively on policies that emphasize the prevention of war This lack of a conflict termination strategy Cimbala asserts leaves nations open to the danger of a quickly escalating nuclear conflict should prevention policies fail and a war in Europe actually occur In developing his arguments Cimbala considers the relationship between war and politics as perceived by Soviet and Western planners compares the superpowers likely views on the process of escalation and assesses the command control and communications perspectives implicit in Soviet and American writings and deployments and their implications for war termination Cimbala begins with an overview of the problems and choices involved in ending war in Europe under contemporary conditions Subsequent chapters examine such topics as the philosophical and practical issues

related to the problem of preemption the problem of military stability and its specific applications to modern Europe and Western and Soviet approaches to the escalation and limitation of war Soviet perspectives on command and control as well as the Soviet view of war termination receive extended treatment in two chapters Finally Cimbala contrasts the orthodox view of mutual assured destruction with the strategic revisionism of defense dominance or mutual assured survival He concludes that policymakers and military planners must recognize that nuclear weapons will almost certainly be a part of any war in Europe and that termination must focus on limiting the use of these weapons before the pressures of in the field escalation tendencies begin to work against the early conclusion of a conflict Students and scholars of military policy will find Cimbala s work enlightening and provocative reading

Strategic Impasse Stephen J. Cimbala, 1989-08-23 There is probably no area of more crucial concern nor one more subject to possible misunderstanding and riddled with paradox than nuclear weapons and their use not only in war but as deterrents to war In Strategic Impasse Cimbala examines the critical issues problems and paradoxes inherent in the current nuclear situation It is from a fundamental contradiction the usefulness of nuclear weapons versus the undesirability of nuclear war that nuclear deadlock arises Their usefulness as deterrents is based on their destructive potential and the balance of power in Europe cannot be adjusted until the inflexible bipolar balance of terror is addressed Ironically superpower sovereignty in nuclear first strike retaliation capability shared across the divided East West political buffer zone created the impetus for improvements in conventional warfare To the extent war can be contained below the nuclear threshold conventional weaponry contributes to deterrence by denial One difficulty lies in the improbability of completely isolating the nuclear from the conventional battlefield in a European scenario Also a level of superpower force perceived to be adequate in peacetime might prove to be an inadequate intrawar deterrent Because of the underdevelopment of conceptual frameworks credible deterrence the creation of nuclear campaigns designed to prevent war remains conjectural Highly usable weapons require a command system that can provide for simultaneous fighting and escalation but escalation beyond a certain level conflicts with control and therefore usability In turn low expectations of weapon usability may weaken deterrence In Gorbachev s defensive sufficiency forces for aggression and surprise attack would be diminished while forces for defense would be strengthened The problem lies not only in differentiating between offensive and defensive weaponry but in achieving a consensus on such a definition by NATO s member countries The book is divided into three parts the first section Issues of Theory and Strategy scrutinizes the relationship between offense and defense and examines SDI and more inclusive strategic defense matters It also questions the connection between policy objectives and force and explores the complication of externalities such as relations with allies In section two Stretching Deterrence Cimbala reviews the operational art likely to be employed by the Soviets in a conventionally fought European war and defines and appraises the sensor cyber revolution in technology and its impacts on preferred strategies The final part Beyond Deterrence considers war termination scenarios and related issues including sociopolitical aspects surveys the part

nuclear weapons play in superpower competition in the Third World and explains how issues of sovereignty effect deterrence avoidance and future super power relations Strategic Impasse will enable scholars and students of military affairs as well as political scientists and government officials to see beyond current nuclear rhetoric and to make informed judgments on an issue that fundamentally affects this nation s and the world s future     *Journal of Defense & Diplomacy* ,1988
