**Manchester** David Hands, Sarah Parker, 2000 Manchester is a city undergoing continual change Rich in heritage diverse in nature it is uniquely characterised by its inherent ability to transform itself This book is about the city s rebirth and its changing identity It provides a guide to the city s architecture and documents the pioneering spirit and ingenuity of the designers and planners who have shaped and redefined the essence of a city in motion *Conservation of Modern*

*Architecture* Susan Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike **The Book of British Topography** John Parker Anderson, 1881

**Stephenson Bell Projects** Ken Powell, Kenneth Powell, 2001 The first major monograph about Stephenson Bell Architects the genuinely innovative award winning Manchester based practice Ken Powell the respected architectural critic and writer explores their career and design philosophy in an introductory essay supported by a project by project full colour photographic section Each project contains a description of the building the brief the design challenge and the solution Stephenson Bell Projects is the first major monograph about Stephenson Bell Architects the genuinely innovative highly distinctive Manchester based practice Their work has set the trend in the transformation of Manchester from a neglected post industrial backwater into a young vibrant city of international standing Stephenson Bell s work is clean beautifully detailed and subtly modulated to its context Theirs is what Paul Finch in his foreword describes as an architecture of synthesis reflecting an attitude of respect and admiration for the historical physical and psychological context of the city working with rather than against what exists to create sympathetic contemporary designs New offices such as Trinity Court and Eastgate and loft conversions such as the Smithfield Buildings have marked Stephenson Bell out as one the leading practitioners of regeneration architecture They have won countless awards most recently an RIBA Award for Deansgate Quay which also won a 2001 Housing Design Award along with two other Stephenson Bell schemes Also in 2001 Roger Stephenson has been awarded an OBE for services to architecture Written by Kenneth Powell the respected architectural critic and writer this book explores Roger Stephenson s and Jeff Bell s careers and design philosophy and is supported by a project by project full colour photographic section Each
