Orlando Di Lassos Imitation Magnificats For Counter Reformation Munich:

Orlando di Lasso's Imitation Magnificats for Counter-Reformation Munich David Crook, 2014-07-14 After the Mass Ordinary the Magnificat was the liturgical text most frequently set by Renaissance composers and Orlando di Lasso's 101 polyphonic settings form the largest and most varied repertory of Magnificats in the history of European music In the first detailed investigation of this repertory David Crook focuses on the forty parody or imitation Magnificats which Lasso based on motets madrigals and chansons written by such composers as Josquin and Rore By examining these Magnificats in their social historical and liturgical contexts and in terms of composition theory Crook opens a new window on the breadth and subtlety of an important composer often harshly judged on his use of preexistent music Crook places Lasso amidst the Counter Reformation reforms at the Bavarian court where he composed the Magnificats and where there emerged a fanatical Marian cult that favored this genre In a section on compositional procedure Crook explains that Lasso abandoned the traditional eight psalm tone melodies in his imitation Magnificats considers the new ways he found to represent the tones and describes how Lasso's experimentation reflected the complex relationship between mode and tone in Renaissance theory and practice Arguing that Lasso's varied uses of preexistent music defy current definitions of parody technique Crook in his final chapter reveals the imitation Magnificats as vastly more imaginative and innovative than previous characterizations suggest Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Fisher,2017-05-15 By the late sixteenth century Augsburg was one of the largest cities of the Holy Roman Empire boasting an active musical life involving the contributions of musicians like Jacobus de Kerle Hans Leo Hassler and Gregor Aichinger This musical culture however unfolded against a backdrop of looming religious schism From the mid sixteenth century onward Augsburg was the largest biconfessional city in the Empire housing a Protestant majority and a Catholic minority ruled by a city government divided between the two faiths The period 1580 1630 saw a gradual widening of the divide between these groups The arrival of the Jesuits in the 1580s polarized the religious atmosphere and fueled the assertion of a Catholic identity expressed in public devotional services spectacular processions and pilgrimages to local shrines The Catholic music produced for these occasions both reflected and contributed to the religious divide This book explores the relationship between music and religious identity in Augsburg during this period How did Catholic and Protestant repertoires diverge from one another What was the impetus for this differentiation and what effect did the circulation and performance of this music have on Augsburg s religious culture These questions call for a new cross disciplinary approach to the music history of this era one which moves beyond traditional accounts of the lives and works of composers or histories of polyphonic genres Using a wide variety of archival and musical documents Alexander Fisher offers a holistic view of this musical landscape examining aspects of composition circulation performance and cultural meaning [Reader's Guide to Music](#) Murray Steib,2013-12-02 The Reader s Guide to Music is designed to provide a useful single volume guide to the ever increasing number of English language book length studies in music Each entry consists of a

A Musical Offering Martin Bernstein, 1977. In the great tradition of the German *Festschrift* this book brings together articles by Professor Bernstein's colleagues, friends, and students to honor him on his 70th birthday. Ranging in subject from the *trouvée* song through esoteric aspects of Renaissance studies and authenticity in 18th century musical sources to a lively and irreverent attack on performance practices today, the twenty essays by many of America's most distinguished scholars reflect the breadth and variety of Martin Bernstein's far-reaching interests and demonstrates the vitality and relevance of what is best in musicology today.

The New Grove Dictionary of Music and Musicians: Borowski to Canobbio Stanley Sadie, John Tyrrell, 2001. This reference classic has approximately doubled in size since its last publication 20 years ago and the expansion involves more than the thorough revision and addition of articles about music of the past. More articles about 20th century composers and composer-performers have been added as well as topical articles about the gender-related multicultural and interdisciplinary ways that music is now being studied. Add to these changes that New Grove is also available online making it a source that would have made its many-faceted creator Sir George Grove proud.
