## Origin Of Landscapes:

*The Origin of Landscape* Archibald Geikie, 1906\*      **Landscape in History** Archibald Geikie, 1905      *The Wang Ch'uan Tu, a Landscape of Wang Wei* Berthold Laufer, 1912      **Pacific Island Landscapes** Patrick D. Nunn, 1998 Pacific island landscapes explores the origin and physical history of one of the least known regions of the Earth's surface the Pacific Islands. Never before has such a systematic account of the island groups been compiled. In this volume Patrick Nunn outlines how each of the main island groups originated then gives detailed accounts much from his own research of islands in Fiji, Samoa and Tonga. A final substantive chapter treats the interaction of early human settlers of Pacific Islands and their environments.

Back cover      *Ancient Landscapes* John Bradford, 1980 The author intends to ensure that the practice, potentialities and limitations of aerial archaeological photography are more widely and fully understood. The primary emphasis of the book is on Mediterranean countries which offer a wide scope for aerial discovery.

Department of Prints and Drawings, Laurence Binyon, 1898      **Seeing History: Public History in China** LI Na, 2023-11-06 When public history was imported from the United States to China around the turn of the twenty-first century it was introduced as a sub-field within history and has developed along that path ever since. Professional historians in China even some forward-looking ones see public history as merely presenting a change in the patterns of participation in history-making. This book offers a sharply different view. It contends essentially that public history represents more than a research domain within history or within any existing discipline nor does it fit into any established narratives but rather a fundamental change of the entire process of history-making in China. In this process the public is presuming history. Public history makes obsolete the old structure for building and acquiring historical knowledge; it challenges the old assumptions, supersedes the rigid academic hierarchy and stirs the imaginations of the multitudes. With an assemblage of case studies this work makes a case for a system view of public history-making or public history-ing and launches a concept: complex public history, i.e. public history-ing as complex adaptive systems.

This book presents the currently discussed theoretical approaches to landscape and shows its potentials and limits. The theoretical approaches are discussed on the basis of current questions such as socialisation and the hybridisation of

landscape and combined with empirical results This is followed by a discussion of the landscape policy operationalisation of theoretical considerations and empirical findings
