Terrestrial Mammal Conservation: Global Evidence for the Effects of Interventions for Terrestrial Mammals Excluding Bats and Primates Nick A. Littlewood, Ricardo Rocha, Rebecca K. Smith, Philip A. Martin, Sarah L. Lockhart, Rebecca F. Schoonover, Elspeth Wilman, Andrew J. Bladon, Katie A. Sainsbury, Stuart Pimm, William J. Sutherland, 2020-11-30 *Terrestrial Mammal Conservation* provides a thorough summary of the available scientific evidence of what is known or not known about the effectiveness of all of the conservation actions for wild terrestrial mammals across the world excluding bats and primates which are covered in separate synopses. Actions are organized into categories based on the International Union for Conservation of Nature classifications of direct threats and conservation actions. Over the course of fifteen chapters the authors consider interventions as wide ranging as creating uncultivated margins around fields, prescribed burning, setting hunting quotas and removing non-native mammals. This book is written in an accessible style and is designed to be an invaluable resource for anyone concerned with the practical conservation of terrestrial mammals. The authors consulted an international group of terrestrial mammal experts and conservationists to produce this synopsis. Funding was provided by the MAVA Foundation, Arcadia and National Geographic Big Cats Initiative. *Terrestrial Mammal Conservation* is the seventeenth publication in the Conservation Evidence Series linked to the online resource www.ConservationEvidence.com. Conservation Evidence Synopses are designed to promote a more evidence based approach to biodiversity conservation. Others in the series include *Bat Conservation*, *Primate Conservation*, *Bird Conservation* and *Forest Conservation*, and more are in preparation. Expert assessment of the evidence summarised within synopses is provided online and within the annual publication *What Works in Conservation*.
