

# *So you just bought your first camera...*

## *3 key lessons for every new photographer*

### Shutter speed explained

**J**ust like aperture settings and ISOs, shutter speeds go in a fixed sequence, with each full stop being double (or half) the speed of its neighbour. Though intermediate values are used too.

### Focal length explained

**T**he focal length of a lens and its angle-of-view go hand in hand. Wide-angle lenses have shorter focal lengths, while telephoto lenses have longer focal lengths. The smaller sensors on APS-C format DSLRs have a 1.6x magnifying effect, known as the effective focal length, or EFL.

### Depth of field explained

**T**he aperture is the main factor in dictating how much of the scene appears pin-sharp. The narrower the aperture (larger f-number) the more of the image will be in focus, the wider the aperture, the less of the image will be in focus.
