## Neglected Ape:

*The Neglected Ape* Biruté M.F. Galdikas, R.D. Nadler, N. Rosen, Lori K. Sheeran, 2013-06-19 The orangutan is the most highly endangered species of great ape. Orangutans are threatened by deforestation, poaching, the illegal pet trade, and the isolation and fragmentation of dwindling wild populations. Their conservation is impeded by certain aspects of their ecology, e.g., a rain forest habitat and certain features of their life history, e.g., an eight to twelve year interbirth interval. Added to the U.S. Endangered Species List in 1970, the orangutan is now clearly on the road to extinction. The number of wild orangutans in Borneo and Sumatra is currently estimated to have decreased to between 12,300 and 20,571 individuals. Only 2% of original orangutan habitat is protected, and some of these areas are now being destroyed. Clearly, attention to ecology, demography, censusing, rehabilitation, and conservation is essential if the orangutan is to survive in the wild beyond the next century. The protection of orangutans is a complex, multifaceted problem involving such pressing issues as human poverty, overpopulation, and the economic development of Southeast Asia. Although the orangutan has been placed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), more orangutans were sold illegally in Taiwan between 1990 and 1993 than are housed in all the world's zoos. In the past, scientific and public attention has centered on the African apes. For this reason, the sole Asian great ape, the orangutan, has been called the neglected ape.

*The Neglected Ape* Biruté M.F. Galdikas, R.D. Nadler, N. Rosen, Lori K. Sheeran, 2013-11-11 The orangutan is the most highly endangered species of great ape. The protection of orangutans is a complex, multifaceted problem involving such pressing issues as human poverty, overpopulation, and the economic development of Southeast Asia. Although the orangutan has been placed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), more orangutans were sold illegally in Taiwan between 1990 and 1993 than are housed in all the world's zoos. In the past, scientific and public attention has centered on the African apes. For this reason, the sole Asian great ape, the orangutan, has been called the neglected ape.

*Ethnoprimatology* Michel T. Waller, 2016-07-28 The list of challenges facing nonhuman primates in the 21st century is a long one. The expansion of palm oil plantations to feed a growing consumer class is eating away at ape and monkey habitats in Southeast Asia and Central Africa. Lemurs are hunted for food in the poorest parts of Madagascar, while monkeys are used as medicine in Brazil.

Traditional cultural beliefs are maintaining demand for animal body parts in West African markets while viral YouTube videos of cute and cuddly lorises have increased their market value as pets and endangered their populations. These and other issues are addressed in this book by leading researchers in the field of ethnoprimateology, the study of human-nonhuman primate interactions that combines traditional primatological methodologies with cultural anthropology in an effort to better understand the nuances of our economic, ritualistic, and ecologic relationships.

**Bonobo** Frans B. M. de Waal, Frans Lanting, 2023-11-15 This remarkable primate with the curious name is challenging established views on human evolution. The bonobo, least known of the great apes, is a female-centered egalitarian species that has been dubbed the 'make love, not war' primate by specialists. In bonobo society, females form alliances to intimidate males; sexual behavior in virtually every partner combination replaces aggression and serves many social functions; and unrelated groups mingle instead of fighting. The species's most striking achievement is not tool use or warfare but sensitivity to others. In the first book to combine and compare data from captivity and the field, Frans de Waal, a world-renowned primatologist, and Frans Lanting, an internationally acclaimed wildlife photographer, present the most up-to-date perspective available on the bonobo. Focusing on social organization, de Waal compares the bonobo with its better-known relative, the chimpanzee. The bonobo's relatively nonviolent behavior and the tendency for females to dominate males confront the evolutionary models derived from observing the chimpanzee's male power politics, cooperative hunting, and intergroup warfare. Further, the bonobo's frequent imaginative sexual contacts, along with its low reproduction rate, belie any notion that the sole natural purpose of sex is procreation. Humans share over 98 percent of their genetic material with the bonobo and the chimpanzee. Is it possible that the peaceable bonobo has retained traits of our common ancestor that we find hard to recognize in ourselves? Eight superb full-color photo essays offer a rare view of the bonobo in its native habitat in the rain forests of Zaire, as well as in zoos and research facilities. Additional photographs and highlighted interviews with leading bonobo experts complement the text. This book points the way to viable alternatives to male-based models of human evolution and will add considerably to debates on the origin of our species. Anyone interested in primates, gender issues, evolutionary psychology, and exceptional wildlife photography will find a fascinating companion in *Bonobo: The Forgotten Ape*. This remarkable primate with the curious name is challenging established views on human evolution. The bonobo, least known of the great apes, is a female-centered egalitarian species that has been dubbed the 'make love, not war' primate by specialists.

**GRT APES & HUMANS** Benjamin B. Beck, 2001-08-17 The outgrowth of a workshop held at the Disney Institute in Lake Buena Vista, FL, in June 1998, this volume explores concerns related to the welfare of gorillas, chimpanzees, bonobos, and orangutans held in captivity for breeding programs and other purposes. The contributors, field biologists, academic scientists, zoo professionals, psychologists, sociologists, ethicists, and legal scholars, consider apes in the wild and in captivity, examining the social division between apes and humans from historical, evolutionary, and cognitive perspectives and reviewing the current moral and legal status of great

apes as well as how apes cognitive skills inform these issues Foreword by Jane Goodall Annotation copyrighted by Book News Inc Portland OR     **Anthropoid Apes** Robert Hartmann,1886     **"The Jukes": a Study in Crime, Pauperism, Disease, and Heredity** Richard Louis Dugdale,1877     **Proceedings of the International Conference on "Orangutans, the Neglected Ape"** Jacqueline J. Ogden,Lori Sheeran,Lorraine A. Perkins,1994     Apes of the Impenetrable Forest Craig Britton Stanford,2008 Apes of the Impenetrable Forest The Behavioral Ecology of Sympatric Chimpanzees and Gorillas offers students a scholarly and relevant study This is an account of a nine year project on the behaviour and ecology of chimpanzees and mountain gorillas living in the same African forest Students are able to see the way in which a project is planned and put into action as well as the results     *Creation by Evolution* David Starr Jordan,John Arthur Thomson,Herbert Spencer Jennings,George Howard Parker,Ernest William MacBride,Edwin Grant Conklin,William Berryman Scott,Francis Arthur Bather,John Walter Gregory,Arthur Smith Woodward,Charles Stuart Gager,Edward Wilber Berry,Sir Edward Bagnall Poulton,Sir Arthur Everett Shipley,William Morton Wheeler,Frederic Brewster Loomis,David Meredith Seares Watson,Richard Swann Lull,William King Gregory,Grafton Elliot Smith,Samuel Jackson Holmes,Julian Huxley,1928     **Slang and Its Analogues Past and Present** William Ernest Henley,1890     Slang and Its Analogues Past and Present: A to Byz John Stephen Farmer,1890     **Nelson v.
