*Neighborhood Jobs, Race, and Skills* Daniel Immergluck, 2018-05-20 Originally published in 1998 *Neighbourhood Jobs Race and Skills* argues that race is a powerful and persistent barrier to employment Analysing existing literature this book outlines how racial discrimination in hiring against African Americans appears to remain a contributor to high unemployment rates in black neighbourhoods The book also discusses how issues such as poor schools and physical and social isolation compound employment problems as well as changes in policy on skill requirements and the location of jobs The book argues that combined this is a major contributor to concentrated urban employment and poverty *Neighborhood Jobs, Race, and Skills* Daniel Immergluck, 1998 This book examines the role of job proximity on neighborhood employment rates and the propensity of residents to work close to their own neighborhoods Employment rates in many older and particularly minority neighborhoods rose significantly from 1970 to 1990 The spatial concentration of unemployment and poverty precipitates a number of place based policies including residential dispersal reverse commuting programs and urban economic development The author has developed a model to estimate the effects of jobs located within a neighborhood on the local unemployment rate incorporating measures of skills match between nearby jobs and neighborhood residents and controlling for the number of competing workers in the surrounding area Job proximity however is not the only cause of urban unemployment problems Other contributing factors examined include spatial mismatch employment discrimination skills mismatch and the role of social networks The study finds that although job proximity affects neighborhood unemployment rates the effects are modest and the skill levels of such jobs are important African Americans after controlling for skills match job proximity and other factors are found to suffer from higher unemployment and lower levels of employment at neighborhood jobs than whites and Hispanics Barry Law Review ,1999 GRADIVA JOURNAL OF CONTEMPORARY THEORY AND PRACTICE ,2000 **The Cumulative Book Index** ,1999 **Jobs in America** David Ramm, 2006 This look at the life of the American worker covers issues from salaries wages and benefits to outsourcing the aging workforce and more **Housing Policy Debate** ,2010 **Library Acquisitions List** Martin P. Catherwood Library, 1999 *Race, Politics, and Community Development in U.S. Cities* James Jennings, 2004-07 As U S cities compete for economic resources many city leaders adopt business friendly policies which boost opportunities for big businesses and institutions in their area This progrowth strategy proposes to generate jobs for residents and higher tax revenues for local government As a result according to the logic of progrowth economic benefits will trickle down to improve the living conditions in working class and impoverished neighborhoods In spite of this strategy poverty rates among urban Latinos and Blacks is staggering even in cities that have pursued neoliberal policies These progrowth strategies seem to have had little or no impact on resolving problems like poverty unemployment homelessness and the alienation of youth from communities of color Community development has been and continues to be a response to these kinds of problems But local political struggles can determine

the direction of community development towards neighborhood empowerment and representation of neighborhood interests versus community development on behalf of progrowth policies This issue of the ANNALS examines the interplay between progrowth politics community development and race It goes well beyond a broad brushstroke of the topic and examines several specific cities and how they have implemented these strategies and their impact on impoverished populations and race relations By using concrete examples the authors discuss how community development fits or does not fit within the framework of progrowth policies and politics The volume covers several important themes Community development is not politically neutral and must be discussed within a broad political economic and even global context Local politics play a major role in determining the direction nature and possibilities of community development A high level and sustained community participation is crucial for the representation of low income urban neighborhoods in cities pursuing progrowth policies Race remains a fundamental issue I city politics and influences the political interplay between progrowth strategies and community development Utilizing information and analysis across several disciplines this issue offers important research for students scholars and practitioners in areas of political science economics sociology urban studies and race relations

*Changing Urban Education* Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why *Changing Urban Education* confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved *Changing Urban Education* makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix

While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future      **The Urban Challenge--poverty and Race** Robert Lee Green,1977
