Turner, Bruce G. Link, 2014-08-25 This volume provides an overview of mental health research conducted by sociologists It
discusses dominant themes such as stress the community and mental life family structure social relations and recovery The
unique contribution of sociology to the study of mental health has a long history stretching from the very foundations of
modern sociology Yet it was only twenty years ago that the Section on Sociology of Mental Health of the American
Sociological Association was formed largely in response to a burgeoning rise in the sum and significance of research in the
field Today the section is a large and vibrant one with its own journal *Society and Mental Health* This book explores several
of the themes that have occurred during that period providing both perspectives of the past and prospects for the future The
volume is timely following closely the 20th anniversary of the section's formation Its coverage of key issues and its

Black Social Capital Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for
Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of
civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing
school system Examining the interplay between government and society Orr presents the first systematic analysis of social
capital both within the African American community black social capital and outside it where social capital crosses racial
lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered
African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for
school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental

relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform. He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital. The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for-profit firm to operate nine of its public schools. These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization, site-based management, and other reform alternatives. Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools. *Black Social Capital* offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change.
