Nelsons Women:

Navigating Women's Friendships in American Literature and Culture Kristi Branham, Kelly L. Reames, 2022-11-10 This volume presents a collection of critical essays that center women's friendship in women's literary and artistic production. Analyzing cultural portrayals of women's friendships in fiction, letters, and film, these essays collectively suggest new models of literary interpretation that do not prioritize heterosexual romance. Instead, this book represents friendships as mature and meaningful relationships that contribute to identity formation and political coalition. Both the supportive and competitive aspects of friendships are shown to be crucial to women's identities as individuals, political citizens, and artists. Addressing the complexities of how 20th and 21st century cultural texts construe women's friendships as they navigate patriarchal institutions, this collection advances scholarship on friendship beyond men and masculine models.

New Media in Black Women's Autobiography T. Curtis, 2015-03-04 Examining novelists, bloggers, and other creators of new media, this study focuses on autobiography by American black women since 1980, including Audre Lorde, Jill Nelson, and Janet Jackson. As Curtis argues, these women used embodiment as a strategy of drawing the audience into visceral identification with them and thus forestalling stereotypes.

Women's Studies Linda Krikos, Cindy Ingold, 2004-08-30 This truly monumental work maps the literature of women's studies, covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Core titles and titles that are out of print are noted, and reviews indicate which titles are appropriate as texts or supplemental texts. This definitive guide to the literature of women's studies is a must purchase for academic libraries that support women's studies programs, and it is a useful addition to any academic or public library that endeavors to represent the field. A team of subject specialists has taken on the immense task of documenting publications in the area of women's studies in the last decades of the 20th century. The result is this truly monumental work, which maps the field, covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Most reviews cite and describe similar and contrasting titles, substantially extending the coverage. Core titles and titles that are out of print are noted, and reviews indicate which titles are appropriate as texts or supplemental texts. Taking up where the previous volume by Loeb, Searing, and Stineman left off, this is the definitive guide to the literature of women's studies. It is a must purchase for academic libraries that support women's studies programs and a welcome addition to any academic or public library that endeavors to represent the field.
