## **Nematode Behaviour:**

*Nematode Behaviour* Randy Gaugler, Anwar L. Bilgrami, 2004 Nematode worms are among the most ubiquitous organisms on earth. They include free living forms as well as parasites of plants, insects, humans and other animals. In recent years there has been an explosion of interest in nematode biology including the area of nematode behaviour. The latter has however until now not been synthesized into a single comprehensive volume. *Nematode Behaviour* seeks to redress this imbalance by providing the first comprehensive review of current knowledge of the behaviour of nematodes. Key topics including locomotion and orientation, feeding and reproductive behaviour and biotic and abiotic interactions are reviewed by leading authorities from the USA, UK, India and New Zealand. **The Behaviour of Nematodes** Neil Argo Croll, 1970

Contributed articles **The Physiology and Biochemistry of Free-living and Plant-parasitic Nematodes** Roland N. Perry, Denis J. Wright, 1998 Written by leading research workers from Europe, USA, Australia and New Zealand, this is the only up to date reference book which reviews and integrates all the current research findings on the physiology and biochemistry of these organisms including the molecular information which has accumulated in recent years. **The Organization of Nematodes** Neil Argo Croll, 1976 **Biology of Nematodes** Neil Argo Croll, Bernard E.
