Neolithic Sha Lo Wan:

Neolithic Sha Lo Wan Peter L. Drewett, 1995 **Piecing Together Sha Po** Mick Atha, Kennis Yip, 2016-10-01 Hong Kong boasts a number of rich archaeological sites behind sandy bays. Among these backbeaches is Sha Po on Lamma Island a site which has long captured the attention of archaeologists. However until now no comprehensive study of the area has ever been published. *Piecing Together Sha Po* presents the first sustained analysis framed in terms of a multi period social landscape of the varieties of human activity in Sha Po spanning more than 6 000 years. Synthesising decades of earlier fieldwork together with Atha and Yip's own extensive excavations conducted in 2008-2010 the discoveries collectively enabled the authors to reconstruct the society in Sha Po in different historical periods. The artefacts unearthed from the site some of them unique to the region reveal a vibrant past which saw the inhabitants of Sha Po interacting with the environment in diverse ways. Evidence showing the mastery of quartz ornament manufacture and metallurgy in the Bronze Age suggests increasing craft specialisation and the rise of a more complex competitive society. Later on during the Six Dynasties/Tang period Sha Po turned into a centre in the region's imperially controlled kiln based salt industry. Closer to our time in the nineteenth century the farming and fishing communities in Sha Po became important suppliers of food and fuel to urban Hong Kong. Ultimately this ground breaking work tells a compelling story about human beings' ceaseless reinvention of their lives through the lens of one special archaeological site. A singular effort in the field of Hong Kong archaeology *Piecing Together Sha Po* adopts a social landscape approach to chart the development of a single site over millennia of occupation revealing as it does the untapped potential which careful field investigations hold for generating a better understanding of the region's rich past. Francis Allard Department of Anthropology Indiana University of Pennsylvania This volume is the best overview of the early history of Hong Kong that I know. The authors have articulated patterns of human settlement at Sha Po in a masterly way that informs us not only of Lamma Island or greater Hong Kong but of Lingnan as a whole. I welcome it as the key source for specialists and the interested public alike. Charles Higham Department of Anthropology and Archaeology University of Otago New Zealand It is rare indeed for a multi period study of a region to not only synthesise a vast range of archaeological material but also include incisive points of theory alongside that narrative such as the need to understand evidence at a landscape level and questioning the utility of Neolithic and Bronze Age categories. This is such a book. Steve Roskams Department of Archaeology University of York [Encyclopedia of Prehistory](#) Peter N. Peregrine, Melvin Ember, 2012-12-06 The Encyclopedia of Prehistory represents also defined by a somewhat different set of an attempt to provide basic information sociocultural characteristics than are often on all archaeologically known cultures. Nological cultures Major traditions are covering the entire globe and the entire defined based on common subsistence prehistory of humankind. It is designed as a practice sociopolitical organization and a tool to assist in doing comparative material industries but language ideology research on the peoples of the past. Most and kinship ties play little or no part in of the entries are written by the

world's their definition because they are virtually foremost experts on the particular areas unrecoverable from archaeological and time periods texts. In contrast language ideology and The Encyclopedia is organized accord kinship ties are central to defining ethnography to major traditions. A major tradition logical cultures is defined as a group of populations sharing. There are three types of entries in the similar subsistence practices technology Encyclopedia the major tradition entry and forms of sociopolitical organization the regional subtradition entry and the which are spatially contiguous over a real site entry. Each contains different types of relatively large area and which endure tempo information and each is intended to be valid for a relatively long period. Minimal used in a different way. New Perspectives on the Research of Chinese Culture Pei-kai Cheng, Ka Wai Fan, 2012-12-14. This volume contains high quality articles originally published in Chinese in the Chinese Journal Jiuzhou Xuelin Chinese Cultural Quarterly and new articles written on special invitation by established scholars in the field. The theme of the volume is New Perspectives on Research of Chinese Culture introducing the latest trends and new developments in the research into Chinese history, humanities, music and geography. The articles are written by well known scholars in the field who examine Chinese culture from various new perspectives adopting different research methods.

Villages and Market Towns in Hong Kong Patrick H. Hase, 2024-11-18. Most histories of Hong Kong begin with the arrival of the British and only incidentally mention the pre-colonial eras. In this book Patrick Hase, one of the leaders in the field, provides an important addition to the history of Hong Kong and the Pearl River Delta region, covering topics such as Chinese ethnicity, commerce, port towns, and squatting. It is a truly excellent work that will interest historians, anthropologists, and social scientists. James L. Watson Fairbank Professor of Chinese Society and Anthropology Emeritus Harvard University. This book, an historical and archaeological portrayal of Hong Kong's market villages across the territory, depicts how Hong Kong evolved not through chronicles of emperors and governors but through the ups and downs of different centres of rural life over the centuries. It belongs beyond the bookshelves of historians and archaeologists, anyone wandering the streets of Hong Kong neighbourhoods today wondering how did this place get to be here will find this book well worth reading. After reading this book I will never again look at Tsim Sha Tsui in quite the same way. Gordon Mathews Research Professor and Emeritus Professor of Anthropology The Chinese University of Hong Kong. How have places in Hong Kong evolved since well before the 19th century? Villages and Market Towns in Hong Kong is a vital book showing us how its various suburban settlements came into being. Such a history of immense interest as well as unending fascination. Since arriving at Hong Kong more than half a century ago, Patrick Hase has been researching its local history with a particular focus on the market towns and villages in the New Territories. Due to a lack of written documentation for the study of these communities, much of his research was conducted through oral interviews with village elders in the 1980s and 1990s. Hase sought their memories of the villages in their youth as well as their grandparents' accounts of the communities prior to the age of high technology, urbanization, and modernization. **The Archaeology of Hong Kong** William Meacham, 2009.
