Networking Health Prescriptions For The Internet:

Networking Health National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Computer Science and Telecommunications Board, Committee on Enhancing the Internet for Health Applications: Technical Requirements and Implementation Strategies, 2000-06-12 Consumer health websites have garnered considerable media attention but only begin to scratch the surface of the more pervasive transformations the Internet could bring to health and health care. Networking Health examines ways in which the Internet may become a routine part of health care delivery and payment, public health, health education and biomedical research. Building upon a series of site visits this book Weighs the role of the Internet versus private networks in uses ranging from the transfer of medical images to providing video based medical consultations at a distance. Reviews technical challenges in the areas of quality of service, security, reliability and access and looks at the potential utility of the next generation of online technologies. Discusses ways health care organizations can use the Internet to support their strategic interests and explores barriers to a broader deployment of the Internet. Recommends steps that private and public sector entities can take to enhance the capabilities of the Internet for health purposes and to prepare health care organizations to adopt new Internet based applications.

Nutrition in Promoting the Public's Health Mildred Kaufman, 2007 Continuing advances in the science of nutrition and the study of infectious disease require that nutritionists be skilled in the behavioral sciences and social marketing in order to impact the preventable etiologies of obesity and chronic diseases. Add to that a new understanding of the social and environmental effects on health and illness that will further require nutritionists to expand their expertise and assume new roles in the generation of public policy affecting all areas of society. This important new book covers all aspects of developing

and delivering nutrition related services in the community Grounded in the science of nutrition it offers simple practical guidance and tools for nutritionists whether working in clinical or public health venues to develop and implement effective public nutrition programs Each chapter begins with reader objectives and ends with Points to Ponder and a listing of helpful websites
