REIMAGINING NUCLEAR ARMS CONTROL

A Comprehensive Approach

Negotiating Nuclear Arms Control

Annelies Wilder-Smith

Negotiating Nuclear Arms Control:

Negotiating START Kerry M. Kartchner, The United States and the Soviet Union have been negotiating nuclear arms control agreements for over twenty years yet radical differences remain in the two sides concept of and approaches to strategic stability and arms control This book compares and contrasts those approaches using START Strategic Arms Reduction Treaty as a case study Throughout two decades of negotiation U S policy has been directed toward dialogue that would encourage convergence of American and Soviet thought on nuclear deterrence In Kartchner s view that hope is belied not only by continuing asymmetries in the development and deployment of their strategic nuclear arsenals but by differing U S and Soviet negotiating positions The Reagan administration viewed START as a means of repudiating SALT II restoring a measure of balance in the U S Soviet strategic competition and as a way of closing the so called window of vulnerability In contrast Kartchner analyzes the Soviets differing views of nuclear balance emphasizing their satisfaction with SALT II and a strategic equilibrium shaped by a decade of bilateral arms control Kartchner offers a detailed exposition of the major negotiating issues in START contrasting concerns of U S and Soviet negotiators Not surprisingly each side s agenda was dominated by weapon systems that figure prominently in the other s development program The author concludes by summarizing and comparing American and Soviet quests for stability and drawing up an assessment of U S efforts in both SALT and START to use arms control negotiations as a kind of classroom for instructing Soviet officials in American notions of stabilizing versus destabilizing weapon technology and America s own ethnocentric view of stability START will profoundly affect the acquisition operation maintenance and cost of U S strategic nuclear forces well into the next century The history and analysis presented here will provide an essential source to policymakers and students of military political relations for much needed further study of this treaty s implications

Arms Control Jozef Goldblat, 2002-11-18 A unique and indispensable work that serves both as a basic introduction to the disarmament scene and a reference book for experts Disarmament Times The revised and updated edition of Arms Control The New Guide to Negotiations and Agreements contains the most authoritative and comprehensive survey ever published of the documents related to arms control

Negotiating the New START Treaty Rose Gottemoeller, 2021-05-15 Rose Gottemoeller the US chief negotiator of the New START treaty and the first woman to lead a major nuclear arms negotiation delivers in this book an invaluable insider s account of the negotiations between the US and Russian delegations in Geneva in 2009 and 2010 It also examines the crucially important discussions about the treaty between President Barack Obama and President Dmitry Medvedev and it describes the tough negotiations Gottemoeller and her team went through to gain the support of the Senate for the treaty And importantly at a time when the US Congress stands deeply divided it tells the story of how in a previous time of partisan division Republicans and Democrats came together to ratify a treaty to safeguard the future of all Americans Rose Gottemoeller is uniquely qualified to write this book bringing to the task not only many years of high level experience in

creating and enacting US policy on arms control and compliance but also a profound understanding of the broader politico military context from her time as NATO Deputy Secretary General Thanks to her years working with Russians including as Director of the Carnegie Moscow Center she provides rare insights into the actions of the Russian delegation and the dynamics between Medvedev and then Prime Minister Vladimir Putin Her encyclopedic recall of the events and astute ability to analyze objectively while laying out her own thoughts and feelings at the time make this both an invaluable document of record and a fascinating story In conveying the sense of excitement and satisfaction in delivering an innovative arms control instrument for the American people and by laying out the lessons Gottemoeller and her colleagues learned this book will serve as an inspiration for the next generation of negotiators as a road map for them as they learn and practice their trade and as a blueprint to inform the shaping and ratification of future treaties This book is in the Rapid Communications in Conflict and Security RCCS Series General Editor Dr Geoffrey R H Burn and has received much praise including As advances in technology usher in a new age of weaponry future negotiators would benefit from reading Rose Gottemoeller s memoir of the process leading to the most significant arms control agreement of recent decades Henry Kissinger former U S Secretary of State Rose Gottemoeller s book on the New START negotiations is the definitive book on this treaty or indeed any of the nuclear treaties with the Soviet Union or Russia These treaties played a key role in keeping the hostility between the United States and the Soviet Union from breaking out into a civilization ending war But her story of the New START negotiation is no dry academic treatise She tells with wit and charm the human story of the negotiators as well as the critical issues involved Rose s book is an important and well told story about the last nuclear treaty negotiated between the US and Russia William J Perry former U S Secretary of Defense This book is important but not just because it tells you about a very significant past but also because it helps you understand the future George Shultz former U S Secretary of State

Negotiating Nuclear Arms Control Lloyd Jensen, 1988 *Arms Control by Committee* George Bunn, 1992-08-01 This book is essentially a series of case histories of U S Soviet nuclear arms control negotiations as seen from the American side It describes the processes of governmental decisionmaking for arms control in Washington D C and the techniques for joint U S Soviet decisionmaking at the negotiating table As general counsel of the U S Arms Control and Disarmament Agency and member of U S delegations to disarmament conferences for eight years the author was in a unique position to assess the difficulties of fashioning an arms control treaty that could pass muster within the executive branch of the U S government be approved by U S allies be successfully negotiated with the Soviets and then win the approval of the U S Senate This process will be even more complex now that the United States will face at least four nuclear powers from the former U S S R The book has three purposes The first is to add to the recorded history of the following negotiations the Limited Test Ban Treaty of 1963 the Non Proliferation Treaty of 1968 the ABM Treaty of 1972 and its companion SALT Interim Agreements and the 1987 INF Treaty The author asks in each case What did the president and his assistants do or fail to do to negotiate a

successful agreement The second purpose is to use the case book approach common in law schools and business schools as a teaching device for those who wish to learn how the American government made decisions about arms control negotiations how U S Soviet negotiators reached decisions and what the results of the decisions have been The book s third purpose is to generalize about what works and what does not work in the complex world of arms control negotiations including information on the impact of negotiating committees and comparisons of the process for negotiating arms control treaties with that for achieving arms limits through action and reaction without written agreement The concluding chapter looks to the future What changes will occur in the arms control process given the end of the Cold War and the disintegration of the Soviet Union

The Superpowers and Nuclear Arms Control Dennis Menos,1990-04-23 The nuclear arsenals of the United States and the Soviet Union are larger better equipped and deadlier than at any other time in history This incisive book contends that the superpowers while exhibiting enormous ingenuity in the area of arms development have shown only a minimal interest toward the containment of arms This is a carefully documented evaluation of the mismanagement of nuclear arms control by the superpowers and of their failure to contain the nuclear arms race despite their involvement in the process for over a quarter of a century Only the superpowers can reduce the proliferation of nuclear arms and in the process lessen the likelihood of nuclear war through accident miscalculation or crisis escalation Yet forty four years after Hiroshima not a single wanted nuclear weapon has been eliminated by them The Superpowers and Nuclear Arms Control addresses a broad spectrum of nuclear arms control issues beginning with the history of the nuclear arms race the lukewarm attempts by the superpowers at nuclear arms control and the role of the nuclear havenots The book then considers current threats to arms control evidenced by the termination of the SALT regime and plans to discard the ABM Treaty A discussion of the congressional executive split on numerous key arms control issues is followed by conclusions drawn from observing decades of negotiation Comprehensive appendices contain valuable charts and other documents that reinforce the content of the text This resource is a useful tool for arms control and disarmament activists students and researchers and for the many men and women everywhere who are at a loss to understand why so little is being accomplished in this critical area Stepping Back

William B. Vogeles,1994-04-30 Vogeles provides a contemporary history of the nuclear arms control negotiations of the 1980s tracing these negotiations from their initiation at the beginning of the decade through the agreements that were reached by the end Two chapters provide background on arms control efforts from the mid 1950s through 1980 The work is an analytical history of nuclear arms control bargaining processes and an evaluation of the utility of alternative negotiation strategies for producing agreement Thus the history of these negotiations offers lessons for the continuing pursuit of arms control and other cooperative security arrangement in the post Cold War international order International Negotiations on the Treaty on the Nonproliferation of Nuclear Weapons United States. Grant, 2024-12-10 In this book a former US Department of State senior arms control official critically analyses two pivotal nuclear arms control treaties the established Treaty on the Non Proliferation of Nuclear Weapons NPT and the rising Treaty on the Prohibition of Nuclear Weapons TPNW The book offers a concise and critical analysis of the two illuminating both their strengths and shortcomings The author acknowledges the idealistic goal of the TPNW but argues that its immediate abolitionist stance lacks a roadmap for achievement Instead the book advocates realistic progress within the NPT framework It provides twelve key negotiation topics for fostering meaningful dialogue among nuclear weapon states while emphasizing the urgency of concrete action in a world facing growing nuclear threats
