## Neolithic Revolution:

**The Archaeology of V. Gordon Childe** Vere Gordon Childe, 1994-07 Although V Gordon Childe died 36 years ago he remains the world's most renowned prehistorian. His *What Happened in History* first published in 1942 is probably the most widely read book ever written by an archaeologist. His influence and reputation endure despite the fact that many of the theoretical ideas he propounded as well as his interpretations of European and West Asian prehistory have been profoundly modified or even rejected since his death. With contributions from such distinguished prehistorians as Kent V Flannery, David Harris, Leo S Klejn, John Mulvaney, Colin Renfrew, Michael Rowlands and Bruce Trigger, *The Archaeology of V Gordon Childe* is an attempt to evaluate Childe's achievement from different partly national perspectives and to assess how far and why his work remains significant today. The contributors examine such persistent themes in Childe's thought as the nature of culture and the role of diffusion in cultural evolution and debate the question of whether Childe anticipated processual archaeology in his famous models of the Neolithic and Urban Revolutions. Also included are evaluations of Childe's early career in Australia, his relations with Soviet archaeology including a previously unknown letter from Childe to Soviet archaeologists and his impact on American archaeology.

**The Neolithic Revolution** Susan Meyer, 2016-07-15 The dawn of the Neolithic Era ushered in major changes in the way people lived. In fact these changes were so sweeping that the transition from the Mesolithic Era to the Neolithic Era is referred to as the Neolithic Revolution. The beginnings of agriculture and the domestication of animals both date from this period. These changes to the food supply led people to settle in permanent communities which in turn led to organized societies and social hierarchy. This book examines the factors that could have led to this revolution and the archaeological evidence of which changes happened where and when.

**The Neolithic Revolution** D. M. Knox, David Killingray, 1980-01-01 **The Neolithic Revolution in the Near East** Alan H. Simmons, 2011-04-15 One of humanity's most important milestones was the transition from hunting and gathering to food production and permanent village life. This Neolithic Revolution first occurred in the Near East, changing the way humans interacted with their environment and each other, setting the stage ultimately for the modern world. Based on more than thirty years of fieldwork, this timely volume examines the Neolithic Revolution in the Levantine Near East and the Mediterranean island of Cyprus. Alan H. Simmons explores recent research regarding the emergence of Neolithic populations using both environmental and theoretical contexts and incorporates specific case studies based on his own excavations. In clear and graceful prose, Simmons traces chronological and regional differences within this land of immense environmental contrasts: woodland, steppe, and desert. He argues that the Neolithic Revolution can be seen in a variety of economic, demographic, and social guises and that it lacked a single common stimulus. Each chapter includes sections on history, terminology, geographic range, specific domesticated species, the composition of early villages and households, and the development of social, symbolic, and religious behavior. Most chapters include at least one case study and conclude with a

concise summary In addition Simmons presents a unique chapter on the island of Cyprus where intriguing new research challenges assumptions about the impact and extent of the Neolithic The Neolithic Revolution in the Near East conveys the diversity of our Neolithic ancestors providing a better understanding of the period and the new social order that arose because of it This insightful volume will be especially useful to Near Eastern scholars and to students of archaeology and the origins of agriculture

**The Agricultural Revolution in Prehistory** Graeme Barker,2006-10-05 The Agricultural Revolution in Prehistory addresses one of the most debated and least understood revolutions in the history of our species the change from hunting and gathering to farming Graeme Barker takes a global view and integrates a massive array of information from archaeology and many other disciplines including anthropology botany climatology genetics linguistics and zoology Against current orthodoxy Barker develops a strong case for the development of agricultural systems in many areas as transformations in the life ways of the indigenous forager societies and argues that these were as much changes in social norms and ideologies as in ways of obtaining food With a large number of helpful line drawings and photographs as well as a comprehensive bibliography this authoritative study will appeal to a wide general readership as well as to specialists in a variety of fields

**Social Anthropology and Human Origins** Alan Barnard,2011-03-17 The study of human origins is one of the most fascinating branches of anthropology Yet it has rarely been considered by social or cultural anthropologists who represent the largest subfield of the discipline In this powerful study Alan Barnard aims to bridge this gap Barnard argues that social anthropological theory has much to contribute to our understanding of human evolution including changes in technology subsistence and exchange family and kinship as well as to the study of language art ritual and belief This book places social anthropology in the context of a widely conceived constellation of anthropological sciences It incorporates recent findings in many fields including primate studies archaeology linguistics and human genetics In clear accessible style Barnard addresses the fundamental questions surrounding the evolution of human society and the prehistory of culture suggesting a new direction for social anthropology that will open up debate across the discipline as a whole

**Unified Growth Theory** Oded Galor,2011-04-11 For most of the vast span of human history economic growth was all but nonexistent Then about two centuries ago some nations began to emerge from this epoch of economic stagnation experiencing sustained economic growth that led to significant increases in standards of living and profoundly altered the level and distribution of wealth population education and health across the globe The question ever since has been why This is the first book to put forward a unified theory of economic growth that accounts for the entire growth process from the dawn of civilization to today Oded Galor who founded the field of unified

growth theory identifies the historical and prehistorical forces behind the differential transition timing from stagnation to growth and the emergence of income disparity around the world Galor shows how the interaction between technological progress and population ultimately raised the importance of education in coping with the rapidly changing technological environment brought about significant reduction in fertility rates and enabled some economies to devote greater resources toward a steady increase in per capita income paving the way for sustained economic growth Presents a unified theory of economic growth from the dawn of civilization to today Explains the worldwide disparities in living standards and population we see today Provides a comprehensive overview of the three phases of the development process Analyzes the Malthusian theory and its empirical support Examines theories of demographic transition and their empirical significance Explores the interaction between economic development and human evolution

*The Neolithic Demographic Transition and its Consequences* Jean-Pierre Bocquet-Appel, Ofer Bar-Yosef, 2008-09-30 The transition from hunting and gathering to farming the Neolithic Revolution was one of the most significant cultural processes in human history that forever changed the face of humanity. Natural communities 15 100 12 000 Cal BP all dates in this chapter are calibrated before present planted the seeds of change and the Pre Pottery Neolithic PPN ca 12 000 ca 8 350 Cal BP people were the first to establish farming communities. The revolution was not fully realized until quite late in the PPN and later in the Pottery Neolithic PN period. We would like to ask some questions and comment on a few aspects emphasizing the linkage between biological and cultural developments during the Neolithic Revolution. The biological issues addressed in this chapter are as follows: Is there a demographic change from the Natural to the Neolithic? Is there a change in the overall health of the Neolithic populations compared to the Natural? Is there a change in the diet and how is it expressed? Is there a change in the physical burden stress people had to bear with? Is there a change in intra and inter community rates of violent encounters? From the cultural perspective the leading questions will be: What was the change in the economy and when was it fully realized? Is there a change in settlement patterns and site nature and organization from Natural to Neolithic? Is there a change in human activities and division of labor?

*The Great Unbundling* J. Y. Sterling, 2025-07-04 For hundreds of thousands of years the story of human success was the story of a unique and powerful package. In what this groundbreaking book calls the era of the Bundled Ape our ancestors dominated the planet by combining analytical intelligence, emotional connection and physical dexterity within a single vessel the individual human. Our societies, economies and even our myths were built on the assumption that the person with the idea is also the one who feels the passion, directs the hands and experiences the consequences. Now that bundle is coming apart. In *The Great Unbundling* the author presents a stunning new thesis for understanding our turbulent times. The true disruption of artificial intelligence is not that it's a new tool but that it is the engine of a historical process that is systematically isolating each of our core functions improving them beyond human capacity and rendering the original human package obsolete. This unbundling is being driven at a breakneck pace by the relentless profit seeking engine of modern capitalism which sees in AI the ultimate instrument for maximizing efficiency. The evidence is everywhere. The Unbundling of Labor Generative AI is poised to automate or degrade the work of 300 million full time employees striking at the heart of the knowledge economy from law and finance to journalism and medicine. The Unbundling of Intelligence For the first time raw problem solving capability is being divorced from conscious understanding. An AI can pass the medical licensing exams without knowing what it means to heal or ace the bar exam.

without a concept of justice forcing us to ask what expertise truly means The Unbundling of Connection In an age of profound loneliness AI is stepping in to meet our most fundamental needs With AI companions parasocial relationships and algorithmically curated communities emotional fulfillment is being unbundled from the messy unpredictable and deeply rewarding work of human to human connection What happens to a species whose core evolutionary advantage has been deconstructed and outsourced What is the economic value of a human being in a world where our bundled skills are no longer competitive This leads to the crisis of humanism itself and forces us to consider radical solutions like Universal Basic Income not as a political choice but as a potential civilizational necessity in the face of a useless class But this is not another prophecy of doom The unbundling is not an endpoint but a turning point The Great Unbundling is the first book to chart the powerful counter current that is rising in response The Great Re bundling This is the story of the conscious human effort to forge a new purpose From the new artisans who are building thriving businesses on the very integrated authentic human skills that AI cannot replicate to the political movements and policymakers fighting to subordinate this new technology to human values a new path is being forged The Great Unbundling is a profound deeply researched and ultimately hopeful guide to the most important transition of our lifetime It provides the essential framework for understanding the forces reshaping our world and offers a stirring vision for how we can actively create our future This provocative and insightful work argues that we are at a civilizational crossroads We can either passively accept our unbundling or begin the conscious creative and difficult work of forging a new human purpose Essential reading for aficionados of Yuval Noah Harari Nick Bostrom and Kai Fu Lee The Great Unbundling is sure to spark debate and will forever change how you think about the future of humanity

**The Archaeology of Africa** Thurstan Shaw,1993 Africa has a vibrant past It emerges from this book as the proud possessor of a vast and highly complicated interweaving of peoples and cultures practising an enormous diversity of economic and social strategies in an Extraordinary range of environmental situations At long last the archaeology of Africa has revealed enough of Africa s unwritten past to confound preconceptions about this continent and to upset the picture inferred from historic written records Without an understanding of its past complexities it is impossible to grasp Africa s present let alone its future

**Neolithic Revolution** E. J. Peltenburg,Alexander Wasse,2004 The move towards a sedentary way of life had a profound effect on the human way of life the development of complex societies can be directly attributed to the beginnings of farming in place of a nomadic hunter gatherer lifestyle When Gordon Childe coined the term Neolithic revolution he meant it to reflect these vast changes that had occurred in the near east This book extends the reach of these changes to include Cyprus presenting new evidence that shows that the island played host to settled farming communities at the same time as the mainland pushing its habitation back by 2000 years
