# Netscape Mozilla Soure Code Guide

**José A. Ramalho**

## **Netscape Mozilla Soure Code Guide:**

*Netscape Mozilla Source Code Guide* William R. Stanek, 1999-12-23 In this friendly authoritative guide bestselling author Stanek guides programmers through the complex maze of Netscape Communicator's code which contains approximately 30 million lines of code that are extremely difficult to navigate. He introduces Mozilla and the Netscape Open Source program, discusses how to become involved and shows how to use the library hooks and extensions. [A Practical Guide to Ubuntu Linux](#) Mark G. Sobell, 2015 Mark Sobell presents a comprehensive start to finish reference for installing, configuring and working with Ubuntu Linux desktop and servers.

**A Practical Guide to Fedora and Red Hat Enterprise Linux** Mark G. Sobell, 2014 A Practical Guide to Fedora and Red Hat Enterprise Linux takes the reader from beginner to advanced. Mark Sobell teaches both the hows and the whys of Fedora and Red Hat Enterprise Linux to help readers reach the solution faster than ever. Now fully updated for both Fedora Core 19 and Red Hat Enterprise Linux 7, this new edition walks readers through every essential feature and technique they'll need now and for years to come.

[Amazon Hacks](#) Paul Bausch, 2003 With this collection of tips and tools users can get the most out of Amazon.com whether they are avid Amazon shoppers, Amazon associates, developing online storefronts or programmers building apps based on Amazon Web Services.

[Advances in Software Engineering](#) Hakan Erdogan, Oryal Tanir, 2013-03-20 Software engineering is a rapidly growing and changing field. Over the last decade it has gained significant popularity and it is now heralded as a discipline of its own. This edited collection presents recent advances in software engineering in the areas of evolution, comprehension and evaluation. The theme of the book addresses the increasing need to understand and assess software systems in order to measure their quality, maintain them, adapt them to changing requirements and technology, and migrate them to new platforms. This need can be satisfied by studying how software systems are built and maintained by finding new paradigms and by building new tools to support the activities involved in developing contemporary software systems. The contributions to the book are from major results and findings of leading researchers under the mandate of the Consortium for Software Engineering Research (CSER). CSER has been in existence since 1996. The five founding industrial and academic partners wanted to create a research environment that would appeal to the applied nature of the industrial partners as well as to advance the state of the art and develop fresh expertise. The research projects of the Consortium are partially funded by the industrial partners and partially by the Natural Sciences and Engineering Research Council of Canada. Technical and administrative management of the Consortium is provided by the National Research Council of Canada specifically by members of the Software Engineering Group of the Institute for Information Technology.
