## **Network Access Regulation And Antitrust:**

*Network Access, Regulation and Antitrust* Diana L. Moss, 2005-03-04 The rapid growth of network industries has generated much comment amongst academics and policy makers This timely volume takes an interdisciplinary case study based approach to examining network issues and experiences in order to develop recommendations that can inform antitrust regulatory and legislative policy Legal economic political and institutional aspects of network access are analyzed The first part of the volume focuses on five topics that are central to reasoned analysis of the access problem The second part presents ten case studies of network access in the energy transportation telecommunications internet and banking industries The volume concludes with comparisons and contrasts across the cases and policy recommendations *Network Access Regulation and Antitrust* will prove invaluable to students of business economics law and economics and industrial economics policy makers and academics working in the field

*EU Competition Law and the Information and Communication Technology Network Industries* Andrej Fatur, 2012-03-08 Competition policies have long been based on a scholarly tradition focused on static models and static analysis of industrial organisation However recent developments in industrial organisation literature have led to significant advances moving beyond traditional static models and a preoccupation with price competition to consider the organisation of industries in a dynamic context This is especially important in the field of information and communication technology ICT network industries where competition centres on network effects innovation and intellectual property rights and where the key driver of consumer benefit is technological progress Consequently when an antitrust intervention is contemplated a number of considerations that arise out of the specific nature of the ICT sector have to be taken into account to ensure improved consumer welfare This book considers the adequacy of existing EU competition policy in the area of the ICT industries in the light of the findings of modern economic theory Particular attention is given to the implications of these dynamic markets for the competitive assessment and treatment of the most common competitive harms in this area such as non price predatory practices tying and bundling co operative standard setting platform joint ventures and co operative R D

**The Digital Economy and Competition Law in Asia** Steven Van Uytsel, 2021-05-06 The digital economy broadly defined as the economy operating on the basis of interconnectivity between people and businesses has gradually spread over the world Although a global phenomenon the digital economy plays out in local economic political and regulatory contexts The problems thus created by the digital economy may be approached differently depending on the context This edited collection brings together leading scholars based in Asia to detail how their respective jurisdictions respond to the competition law problems evolving out of the deployment of the digital economy This book is timely because it will show to what extent new competition law regimes or those with a history of lax enforcement can respond to these new developments in the economy Academics in law and business strategies with an interest in competition law both in Asia and more broadly will find the insights in this edited collection invaluable Further this volume will be a key resource for scholars
