## **Material Faith Thoreau On Science:**

*Material Faith* Henry David Thoreau, 1999 Thoreau developed ideas fundamental to ecology 50 years before that word was coined He called for a science that would join man and nature a conscience a moral knowledge founded on material faith Edited by Laura Dassow Walls Part of The Spirit of Thoreau Series 20 30 drawings by Thoreau **Thoreau's Botany** James Perrin Warren, 2023-08-11 Thoreau's last years have been the subject of debate for decades but only recently have scholars and critics begun to appreciate the posthumous publications unfinished manuscripts and Journal entries that occupied the writer after Walden 1854 Until now no critical reader has delved deeply enough into botany to see how Thoreau's plant studies impact his thinking and writing Thoreau's Botany moves beyond general literary appreciation for the botanical works to apply Thoreau's extensive studies of botany from 1850 to his death in 1862 to readings of his published and unpublished works in fresh interdisciplinary ways Bringing together critical plant studies ecocriticism and environmental humanities James Perrin Warren argues that Thoreau's botanical excursions establish a meeting ground of science and the humanities that is only now ready to be recognized by readers of American literature and environmental literature **Romantic Ecocriticism** Dewey W. Hall, 2016-03-15 Romantic Ecocriticism Origins and Legacies is unique due to its rare assemblage of essays which has not appeared within an edited collection before Romantic Ecocriticism is distinct because the essays in the collection develop transnational and transhistorical approaches to the proto ecological early environmental aspects in British and American Romanticism First the edition's transnational approach is evident through transatlantic connections such as but are not limited to comparisons among the following writers William Wordsworth William Howitt and Henry D Thoreau John Clare and Aldo Leopold Charles Darwin and Ralph W Emerson Second the transhistorical approach of Romantic Ecocriticism is evident in connections among the following writers William Wordsworth and Emily Bronte Thomas Malthus and George Gordon Byron James Hutton and Percy Shelley Erasmus Darwin and Charlotte Smith Gilbert White and Dorothy Wordsworth among others Thus Romantic Ecocriticism offers a dynamic collection of essays dedicated to links between scientists and literary figures interested in natural history **The Language of Plants** Monica Gagliano, John C. Ryan, Patrícia Vieira, 2017-04-25 The eighteenth century naturalist Erasmus Darwin grandfather of Charles argued that plants are animate living beings and attributed them sensation movement and a certain degree of mental activity emphasizing the continuity between humankind and plant existence Two centuries later the understanding of plants as active and communicative organisms has reemerged in such diverse fields as plant neurobiology philosophical posthumanism and ecocriticism The Language of Plants brings together groundbreaking essays from across the disciplines to foster a dialogue between the biological sciences and the humanities and to reconsider our relation to the vegetal world in new ethical and political terms Viewing plants as sophisticated information processing organisms with complex communication strategies they can sense and respond to environmental cues and play an active role in their own survival and reproduction through

chemical languages radically transforms our notion of plants as unresponsive beings ready to be instrumentally appropriated By providing multifaceted understandings of plants informed by the latest developments in evolutionary ecology the philosophy of biology and ecocritical theory *The Language of Plants* promotes the freedom of imagination necessary for a new ecological awareness and more sustainable interactions with diverse life forms Contributors Joni Adamson Arizona State U Nancy E Baker Sarah Lawrence College Karen L F Houle U of Guelph Luce Irigaray Centre National de la Recherche Scientifique Paris Erin James U of Idaho Richard Karban U of California at Davis Andr Kessler Cornell U Isabel Kranz U of Vienna Michael Marder U of the Basque Country UPV EHU Timothy Morton Rice U Christian Nansen U of California at Davis Robert A Raguso Cornell U Catriona Sandilands York U *Until Darwin, Science, Human Variety and the Origins of Race* B Ricardo Brown, 2015-10-06 This work fills a gap in recent studies on the history of race and science Focusing on both the classification systems of human variety and the development of science as the arbiter of truth Brown looks at the rise of the emerging sciences of life and society biology and sociology as well as the debate surrounding slavery and abolition

*Rethinking Wilderness and the Wild* Robyn Bartel, Marty Branagan, Fiona Utley, Stephen Harris, 2020-10-29 *Rethinking Wilderness and the Wild* Conflict Conservation and Co existence examines the complexities surrounding the concept of wilderness Contemporary wilderness scholarship has tended to fall into two categories the so called fortress conservation and co existence schools of thought This book contending that this polarisation has led to a silencing and concealment of alternative perspectives and lines of enquiry extends beyond these confines and in particular steers away from the dilemmas of paradise or paradox in order to advance an intellectual and policy agenda of plurality and diversity rather than of prescription and definition Drawing on case studies from Australia Aotearoa New Zealand the United States and Iceland and explorations of embodied experience creative practice philosophy and First Nations land management approaches the assembled chapters examine wilderness ideals conflicts and human nature dualities afresh and examine co existence and conservation in the Anthropocene in diverse ontological and multidisciplinary ways By demonstrating a strong commitment to respecting the knowledge and perspectives of Indigenous peoples this work delivers a more nuanced ethical and decolonising approach to issues arising from relationships with wilderness Such a collection is immediately appropriate given the political challenges and social complexities of our time and the mounting threats to life across the globe The abiding and uniting logic of the book is to offer a unique and innovative contribution to engender transformations of wilderness scholarship activism and conservation policy This text refutes the inherent privileging and exclusionary tactics of dominant modes of enquiry that too often serve to silence non human and contrary positions It reveals a multi faceted and contingent wilderness alive with agency diversity and possibility This book will be of great interest to students and scholars of conservation environmental and natural resource management Indigenous studies and environmental policy and planning It will also be of interest to practitioners policymakers and NGOs involved in conservation protected environments and

environmental governance     Walden's Shore Robert M. Thorson,2014-01-06 Walden s Shore explores Thoreau s understanding of the living rock on which life s complexity depends not as metaphor but as physical science Robert Thorson s subject is Thoreau the rock and mineral collector interpreter of landscapes and field scientist whose compass and measuring stick were as important to him as his plant press     **On Foot** Joseph Amato,2004-11 In this lively social history Amato author of *Dust* tells the large scale and small scale stories of what was man s first mode of travel walking     **The Boatman** Robert M. Thorson,2017-04-24 Robert Thorson gives readers a Thoreau for the Anthropocene The boatman and backyard naturalist was keenly aware of the way humans had altered the waterways and meadows of his beloved Concord River Valley Yet he sought out for solace and pleasure those river sites most dramatically altered by human invention and intervention for better and worse     The Thoreau Society Bulletin Thoreau Society,1999     **Henry David Thoreau** Michael Berger,2025-08-01 Thoreau is well known as a lyrical nature writer environmental prophet rebel against stifling convention and theorist of strategic intervention to protest injustice He was also a part time surveyor and pencil maker student of Native America abolitionist philosopher and shrewd Transcendentalist Whether living at Walden Pond or comfortably on Main Street in central Concord Thoreau made deep inquiries into life and gave all to his craft Drawing on the work of outstanding scholars and critics this companion provides information on the full body of Thoreau s work his life and his world connecting the factors that affected Thoreau s thought and writing and highlighting his impact in his own time and since This study brings these various aspects of Thoreau s life and writings into focus in over one hundred interconnected essays     **The Arizona Quarterly** ,2012     *Environmental Ethics* ,2003     **Science and Faith** Hugh Wheeler Sanford,1930     **The Faith, the Falsity and the Failure of Christian Science** Woodbridge Riley,Frederick William Peabody,Charles Edward Humiston,1925     *Richard Pousette-Dart* Richard Pousette-Dart,2005 This groundbreaking volume on Richard Pousette Dart is the most comprehensive publication on his painting to be published since the artist s death It provides fresh insights into his oeuvre by five outstanding contemporary art historians who have interpreted the artist s creative output from the 1930s to 1992 Richard Pousette Dart one of the founding members of the New York School created paintings drawings sculptures and journals for over sixty years The youngest member of the first generation of American Abstract Expressionists Pousette Dart shared with his fellow artists interests in psychology myth making anthropology and both African and American tribal art Along with Pollock Rothko de Kooning Motherwell and others Pousette Dart created the art movement known as The New York School This book presents the evolution of Richard Pousette Dart s styles and philosophy and provides an in depth look at his ever evolving painting techniques The essays focus on his major themes and periods and include his contributions to the complexity of the intellectual and stylistic language of the Abstract Expressionist movement     Against the Machine Nicols Fox,2002-10 From the cars we drive to the instant messages we receive from debate about genetically modified foods to astonishing strides in cloning robotics and nanotechnology it would be hard to deny technology s powerful grip on our

lives To stop and ask whether this digitized implanted reality is quite what we had in mind when we opted for progress or to ask if we might not be creating more problems than we solve is likely to peg us as hopelessly backward or suspiciously eccentric Yet not only questioning but challenging technology turns out to have a long and noble history In this timely and incisive work Nicols Fox examines contemporary resistance to technology and places it in a surprising historical context She brilliantly illuminates the rich but oftentimes unrecognized literary and philosophical tradition that has existed for nearly two centuries since the first Luddites the machine breaking followers of the mythical Ned Ludd lifted their sledgehammers in protest against the Industrial Revolution Tracing that current of thought through some of the great minds of the 19th and 20th centuries William Blake Mary Shelley Charles Dickens John Ruskin William Morris Henry David Thoreau Ralph Waldo Emerson Robert Graves Aldo Leopold Rachel Carson and many others Fox demonstrates that modern protests against consumptive lifestyles and misgivings about the relentless march of mechanization are part of a fascinating hidden history She shows as well that the Luddite tradition can yield important insights into how we might reshape both technology and modern life so that human community and environmental values take precedence over the demands of the machine In *Against the Machine* Nicols Fox writes with compelling immediacy bringing a new dimension and depth to the debate over what technology means both now and for our future     Arts & Humanities Citation Index ,2000     *Perspectives on Science and Christian Faith* ,1998     *The Publishers Weekly* ,1929
