**Material Immaterial** Botond Bogner, Kengo Kuma, 2009-11-04 Presents more than thirty of the architect's recent works including high profile commissions such as the Suntory Museum in Tokyo and the Ondo Civic Center in Kure the exclusive Lotus House in Zushi large scale urban developments in Sanlitun Village South in Beijing and more *The Yoga of Love*, 2025-05-19 The idea that something can be present at every place has engendered much discussion both in the past and at present Typically omnipresence is thought to be a divine attribute but the question as to how something can be omnipresent has not been historically confined to the status of a divine being The Oxford Handbook of Omnipresence offers an insight into historical accounts of omnipresence and its developments in ancient medieval modern and contemporary thought It further widens the study of omnipresence by including less widely studied strands of thought on this topic from mystical process theological feminist theological and phenomenological perspectives Additionally whilst the study of omnipresence has typically focused on Christian thinkers the volume broadens the range of voices on this attribute further by including Jewish Islamic Buddhist Sanskrit and Donghak accounts The Handbook provides an introduction to the main facets of omnipresence both historical and contemporary and opens up new avenues for research that are yet to be fully explored **Supreme Court of the State of New York**, 1936 **The Epigenesis of Mind** Susan Carey, Rochel Gelman, 2014-01-14 Reflecting the focus of a Jean Piaget Symposium entitled Biology and Knowledge Structural Constraints on Development this volume presents many of the emergent themes discussed Among these themes are Structural constraints on cognitive development and learning come in many shapes and forms and involve appeal to more than one level of analysis To postulate innate knowledge is not to deny that humans can acquire new concepts It is unlikely that there is only one learning mechanism even if one prefers to work with general as opposed to domain specific mechanisms The problems of induction with respect to concept acquisition are even harder than originally thought *ACRN Proceedings in Finance and Risk Series '13* Dr. Othmar M. Lehner, Dr. Richard Harrison, 2014-03-06 Proceedings of the 14th FRAP Finance Risk and Accounting Perspectives conference taking place in Cambridge UK **Property Versatility and Copredication** David Liebesman, Ofra Magidor, 2025-05-05 Nearly all properties are to a certain extent versatile there are many different ways to instantiate them Consider a light blue scarf and a dark blue gemstone They share the property of being blue despite being different kinds of objects and differing in the way in which they are blue The key insight explored in this book is that this apparently mundane observation should be extended many properties are considerably more versatile than theorists typically take them to be This insight turns out to be incredibly powerful in addressing a wide range of issues in the philosophy of language metaphysics and beyond One such issue is the problem of copredication Copredication sentences such as Lunch was delicious but took hours are common yet puzzling These sentences can be true despite seemingly ascribing incompatible properties it appears that only the food eaten can be delicious and only the event attended can take hours This book offers a comprehensive

discussion of the problem of copredication including a critical evaluation of extant approaches to the problem and culminating with a defence of the Property Versatility approach to copredication In addition the book demonstrates how Property Versatility is a powerful tool in addressing a wide range of issues beyond copredication including the semantics of generics the metaphysics of establishments and repeatable artworks fictional discourse and the nature of ambiguity as well as a host of others

**Metaphysical Themes 1274-1671** Robert Pasnau, 2013-02-07 Robert Pasnau traces the developments of metaphysical thinking through four rich but for the most part neglected centuries of philosophy running from the thirteenth century through to the seventeenth At no period in the history of philosophy other than perhaps our own have metaphysical problems received the sort of sustained attention they received during the later Middle Ages and never has a whole philosophical tradition come crashing down as quickly and completely as did scholastic philosophy in the seventeenth century The thirty chapters work through various fundamental metaphysical issues sometimes focusing more on scholastic thought sometimes on the seventeenth century Pasnau begins with the first challenges to the classical scholasticism of Bonaventure and Thomas Aquinas runs through prominent figures like John Duns Scotus and William Ockham and ends in the seventeenth century with the end of the first stage of developments in post scholastic philosophy on the continent with Descartes and Gassendi and in England with Boyle and Locke
