## **Material World Glass:**

Materials World ,2000      *In the Looking Glass* Rebecca K. Shrum,2017-08-30 An utterly fascinating reading of the multiple uses and meanings of mirrors among European Americans African Americans and Native Americans Journal of Social History What did it mean Rebecca K Shrum asks for people long accustomed to associating reflective surfaces with ritual and magic to become as familiar with how they looked as they were with the appearance of other people Fragmentary histories tantalize us with how early Americans people of Native European and African descent interacted with mirrors Shrum argues that mirrors became objects through which white men asserted their claims to modernity emphasizing mirrors as fulcrums of truth that enabled them to know and master themselves and their world In claiming that mirrors revealed and substantiated their own enlightenment and rationality white men sought to differentiate how they used mirrors from not only white women but also from Native Americans and African Americans who had long claimed ownership of and the right to determine the meaning of mirrors for themselves Mirrors thus played an important role in the construction of early American racial and gender hierarchies Drawing from archival research as well as archaeological studies probate inventories trade records and visual sources Shrum also assesses extant mirrors in museum collections through a material culture lens Focusing on how mirrors were acquired in America and by whom as well as the profound influence mirrors had both individually and collectively on the groups that embraced them *In the Looking Glass* is a piece of innovative textual and visual scholarship A superb reflection of the many meanings held by an object usually taken for granted Highly recommended Choice      Material Design Thomas Schröpfer,2012-12-13 The approach of Informing Architecture by Materiality opens the way to an innovative use of materials in the design professions Taking material qualities and properties such as texture elasticity transparency and fluidity as a point of departure the concept described and employed here transcends the conventional definitions of building materials Instead the focus is on a multitude of material operations like folding and bending carving and cutting weaving and knitting mirroring and screening The featured design strategies and methods address established and new materials alike They are applied both to the scale of the detail and the entire building The examples comprise prototype structures as well as large building projects Eight chapters deal with surfaces and layers joints and junctions weaving and texturing nanoscale transformations responsiveness the integration of ephemeral factors like wind and light as well as material collections providing professional resources Written by renowned experts in this field the book features many examples from international contemporary architecture The introductory part provides the conceptual background while a final chapter describes consequences for pressing issues of today like sustainability or life cycle assessment      **Touch It!** Adrienne Mason,2005-08 This book in the Primary Physical Science series is full of surprising facts and hands on activities to help kids explore the world of materials      **Bulletin** ,1928      **American Florist** ,1905      **Materialized Identities in Early Modern Culture, 1450-1750** Susanna Burghartz,Lucas Burkart,Christine

Göttler,Ulinka Rublack,2025-10-01 This collection embraces the increasing interest in the material world of the Renaissance and the early modern period which has both fascinated contemporaries and initiated in recent years a distinguished historiography The scholarship within is distinctive for engaging with the agentic qualities of matter showing how affective dimensions in history connect with material history and exploring the religious and cultural identity dimensions of the use of materials and artefacts It thus aims to refocus our understanding of the meaning of the material world in this period by centring on the vibrancy of matter itself To achieve this goal the authors approach the material through four themes glass feathers gold paints and veils in relation to specific individuals material milieus and interpretative communities In examining these four types of materialities and object groups which were attached to different sensory regimes and valorizations this book charts how each underwent significant changes during this period     **Documents** ,1998     *The Glass Industry* ,1928

*Interior Design Details* Nonie Niesewand,2006-11-21 Interior Design Details brings together the best in contemporary interior design Much more than an illustrated directory of the most beautiful and amazing objects available today this book features a collection of inspirational interiors designed by architects and designers that show how to get the latest looks alongside pictures of hundreds of products Including the work of renowned designers such as Frank Gehry Philippe Starck Norman Foster and Daniel Libeskind this book contains a directory of over 800 suppliers which ensures that all the products can be easily sourced With an emphasis on the very latest in smart technology and eco friendly products Interior Design Details is as inspiring as it is useful     **Bodies of Maize, Eaters of Grain: Comparing material worlds, metaphor and the agency of art in the Preclassic Maya and Mycenaean early civilisations** Marcus Jan Bajema,2017-09-30 This book offers a comparative study of the civilisations of the Late Preclassic lowland Maya and Mycenaean Greece The approach used here seeks to combine traditional iconographic approaches with more recent models on metaphor and the social agency of things     *Chinese Glass* Cecilia Braghin,2002     **Mathematical and Physical Papers** William Thomson Baron Kelvin,1890
