## **Materials Evaluation And Design For Language Teaching:**

*Materials Evaluation and Design for Language Teaching* Ian McGrath, 2016-07-11 Teaching materials play a crucial role in teaching learning. When these take the form of a textbook, it is essential that it is carefully selected to meet both external requirements and the needs of the teachers as well as allowing teacher to mediate between the textbook and the learners adapting and supplementing the book as necessary. Providing a systematic approach to the selection and subsequent evaluation of coursebooks, this textbook gives practical advice on adaptation and supplementation and beyond. Suggestions on systematising the process of materials development and on the use of learner generated materials are included for teachers who prefer to prepare their own materials. With integrated and wide ranging coverage of the topic, this is the ideal book for those studying or practising language teaching or applied linguistics. Key Features: Numerous examples, Interleaved tasks which can be utilised by an instructor, Extensive bibliography.

**Materials Evaluation and Design for Language Teaching** Pamela R. Ferguson, 2016 Since the first edition of this book was published in 2002, there have been many changes in language teaching, not least those associated with technological developments. Despite such changes, the same basic needs remain as far as teacher education is concerned. Teachers still need advice on how to evaluate coursebooks and other core materials systematically, source and evaluate other materials, adapt materials, design their own materials. *Materials Evaluation and Design for Language Teaching* provides this, offering a systematic approach to the selection and subsequent evaluation of textbooks and practical advice on their adaptation and supplementation. For teachers who prefer to prepare their own materials, there are suggestions on systematising the process of materials development and on the use of learner generated materials. **Developing Materials for Language Teaching** Brian Tomlinson, 2013-12-19 There have been a number of books published on various aspects of materials development for language teaching, but *Developing Materials for Language Teaching* is the only one which provides a comprehensive coverage of the main aspects and issues in the field. This second edition brings it completely up to date and expands on the original book. It deals with advances in IT and an increasingly globalized world. It is the only publication which views current developments in materials development through the eyes of developers and users of materials from all over the world. In doing so, it applies principles to practice in ways demonstrated to facilitate the effectiveness of language learning materials. The chapters are written so that the book provides critical overviews of recent developments in materials development and at the same time acts as a stimulus for development and innovation in the field. It is intended both for use as a course book on postgraduate and teacher training courses and as a resource for the stimulus and refreshment of teachers, publishers and applied linguists in the field. The book contains updated versions of many of the chapters in the 2003 edition, plus new chapters on corpus informed materials development, materials development for blended learning, materials
