Materials in Chemical Perspective Keith Leslie Watson, 1975 **Chemical Perspectives of Microelectronic Materials**, 1990 Energy Research Abstracts, 1990 **Microplastics in the Environment** Rao Y. Surampalli, Tian C. Zhang, Bashir M. Al-Hashimi, Chih-Ming Kao, Makarand M. Ghangrekar, Puspendu Bhunia, Sovik Das, 2025-04-07 Enables readers to assess manage and prevent damage from the environment's biggest enemy microplastics Microplastics in the Environment addresses the biggest unresolved pollution issue microplastics accumulating in the environment at a rapidly growing rate giving rise to severe ecological stress and novel diseases in both aquatic and terrestrial organisms This book is a one stop resource that ties together the latest developments in this fast moving field including analytical techniques risk assessment methods and predictive approaches and evaluates different strategies that make it possible to minimize and redress microplastics pollution in the near and distant future The book is organized into three main parts Part one explains the fundamental ideas underlying microplastics including their classification major sources detection and characterisation as well as risk assessment methods The second part covers the fate and transport of microplastics in various environmental domains their interaction with ecosystems and the exposure of humans to environment borne microplastics The final part surveys current and future approaches to limit and remove the environmental effects of microplastics from replacement of plastics with biodegradable substitutes to more efficient recycling of plastics to their active removal and remediation Microplastics in the Environment includes information on Microplastics interaction with agricultural crops the food and construction industries and water and solid waste pollution control systems Microplastics in microbial communities crops and soil and the subsequent impacts on microbial metabolism plant growth and geo chemical properties of soil respectively Consumption of microplastics by aquatic life and consequent effects of microplastics on the development of aquatic organisms including corals invertebrates and marine and freshwater biota Global strategies existing regulations and policies focused on microplastics management With its emphasis on management and remediation Microplastics in the Environment is a valuable resource for environmental scientists government agencies and researchers working in the field of microplastics pollution Industrial Organic Chemicals in Perspective, Technology, Formulation and Use Harold A. Wittcoff, Bryan G. Reuben, 1980-11-07 Bridges the gap between the chemist and technologist by considering the relationship between molecular structure and properties Outlines markets for the products of the chemical industry discusses formulations and describes how chemicals are turned into marketable products such as plastics solvents oils detergents drugs food chemicals agrochemicals dyes and photographic chemicals **The Chemical Trade Journal and Chemical Engineer** G Kelville Davis, 1919 **Low-Temperature Plasma Chemical Engineering** Yi Cheng, Xin Tu, 2025-11-01 Low Temperature Plasma Chemical Engineering bridges the gap between the plasma and chemical engineering communities It includes principles and mechanisms of plasma process intensification novel plasma reactor and process design and process optimization The book

highlights various plasma chemical processes such as oxidation of volatile organic compounds VOCs methane reforming CO₂ conversion and biomass tar reforming It also discusses nitrogen fixation plasma agriculture and plasma biotechnology The book further explores advanced oxidation processes organic synthesis in microchannel reactors electrostatic precipitation plasma pyrolysis of coal into acetylene synthesis of nanomaterials and ultrafine powders and solid waste treatment It brings together state of the art research and development in advanced low temperature plasma chemical engineering technologies It also addresses challenges and future perspectives in this emerging area Low Temperature Plasma Chemical Engineering is a valuable resource for scientists engineers technicians and students from various research backgrounds including plasma physics plasma chemistry chemical engineering energy engineering materials science and engineering environmental engineering and electrical engineering Covers the fundamentals and applications of plasma process intensification and plasma enhanced chemical processes bridging the gap between the plasma community and chemical engineering community Summarizes recent advances in plasma chemical engineering technologies and discusses challenges and future perspectives in plasma chemical engineering Written by a group of well known scientists and experts active in low temperature plasma engineering

Materials for Optical Limiting: Volume 374 Robert Crane, 1995-11-20 The advent of lasers has made possible a number of optical based systems and applications such as the compact disc CD laser printers fiber optic communications laser surgical instruments etc Unfortunately while lasers permit these diverse applications safety concerns must be addressed A solution being pursued is the development of optical limiter materials that transmit at low intensities while changing their optical characteristics e g absorption or index of refraction when exposed to the laser s higher

irradiations Topics covered in this book relate directly to the computational design and synthesis of new optical molecules Research on the design of limiter devices is also featured Materials addressed include liquid crystals organic polymers organic dyes C60 colloidal arrays and suspensions transition metal oxides semiconductors and photorefractive oxides Topics include modelling and solid state optical limiters thin film and solid state optical limiters saturable and reverse saturable absorbers liquid optical limiters and liquid crystalline and other optical limiters **Whitaker's Books in Print** ,1990
