Long-Term Innovation Masatoshi Fujiwara, Yaichi Aoshima, 2022-12-16 This book explores how a long term innovation can take place based on historical analyses of the development of reverse osmosis RO membrane from the early 1950s to the mid 2010s The RO membrane is a critical material for desalination that is a key to solve water shortages becoming serious in many places of the world The authors conducted in depth field studies as well as analyses of rich archival data to demonstrate how researchers engineers managers entrepreneurs and policymakers interacted each other for this material innovation to be realized A series of historical analyses in this book uncovered that initial government supports strategic niche markets emergence of breakthrough technology and company specific rationales played significant roles for companies to overcome four types of uncertainty technological market competition and social organizational ones and enabled the companies to persistently invest in the development and commercialization of the RO membrane This book depicts that innovation does not arise on a sudden but that it is actualized through long lasting process with turns and twists which is driven by many non economic rationales beyond economic motives

Ultrafiltration and Microfiltration Handbook Munir Cheryan, 1998-01-26 Soon after its publication in 1987 the first edition of Ultrafiltration Handbook became recognized as the leading handbook on ultrafiltration technology Reviews in professional journals praised it as an authoritative and substantive information resource on this technology Now a completely updated and expanded edition is available under the title Ultrafiltration and Microfiltration Handbook This practical handbook systematically covers the basics of this technology from its scientific fundamentals to a wide range of industrial applications The presentation is clear and concise with the emphasis on practical use Many schematics and micrographs illustrate membranes equipment and processes Numerous tables and graphs provide useful data on specifications and performance The updated information is useful to all those involved in the use of separation and filtration in industrial processes

Water Soluble Poly-N-Vinylamides Yuri E. Kirsh, 1998-03-06 Despite the growing interest in this new generation of water soluble carbon chain polymers there are few books available covering their physicochemical properties Professor Kirsh has addressed this by writing a book which brings together data on their synthesis properties and applications The best known of the group is poly N vinylpyrrolidone PVP discovered in Germany in 1939 hence this book concentrates on PVP and the correlation of its properties with other poly N vinylamides Poly N vinylamides are widely used in the creation of many synthetic polymeric materials and recent discoveries have increased their use in medicine and biotechnology This book will therefore appeal to a wide readership from polymer and materials scientists through to biotechnologists and those working in the pharmaceutical and cosmetics industries

Synthetic Membranes and Membrane Separation Processes Takeshi Matsuura, 2020-09-10 Synthetic Membranes and Membrane Separation Processes addresses both fundamental and practical aspects of the subject Topics discussed in the book cover major industrial membrane separation processes including reverse osmosis ultrafiltration microfiltration membrane gas and vapor separation and pervaporation Membrane materials membrane preparation membrane structure

membrane transport membrane module and separation design and applications are discussed for each separation process. Polymer Membranes for Gas and Vapor Separation Benny D. Freeman, 1999. This book is based on the proceedings of the Chemistry and Materials Science of Synthetic Membranes Symposium in 1997 and includes contributions from scientists working in 18 different countries. It focuses on tailoring separation properties and control of porous membrane formation. An introductory chapter is followed by 22 articles discussing a range of topics including free volume in polymeric membrane materials, facilitated transport membranes, group contribution modeling of gas transport in polymeric membranes and inorganic polymers for gas separation membranes. Distributed by Oxford U Press. Annotation copyrighted by Book News Inc, Portland, OR.

Handbook of Industrial Membrane Technology Mark C. Porter, 1990. This handbook emphasizes the use of synthetic membranes for separations involving industrial or municipal process streams. Discussions on theory, engineering aspects, membrane preparation and typical and projected applications of the various membrane processes are included.

New Membrane Materials and Processes for Separation Kamallesh K. Sirkar, Douglas R. Lloyd, 1988.

Membrane Formation and Modification Ingo Pinnau (ed.), Benny D. Freeman, 2000. Written for polymer chemists and chemical engineers, this book focuses on advances in the principal industrial approaches to the preparation of membranes: the formation of thin film composite membranes and asymmetric membranes.

Ullmann's Encyclopedia of Industrial Chemistry Barbara Elvers, Fritz Ullmann, 1990. Supervised by an internationally acclaimed advisory board, the articles are written by over 3000 international experts from industry and universities, thoroughly edited to uniform style and layout in an in-house office. All figures are redrawn to give a maximum of clarity and uniformity in style. Compared to the prior edition, almost 60% of the material has either been newly written or thoroughly updated. The rest has been checked for validity and newer references have been added throughout.

Membrane Separations in Chemical Engineering A. E. Fouda, 1989. Papers presented at the AIChE Spring National Meeting, Houston, April 1989, deal with the membrane development and the membrane post-treatment for various gas separation processes, membrane gas separation process designs and novel process designs in which membrane gas separations are important components.
