Solutions included. [Amazing Math Puzzles](#) Adam Hart-Davis, 1998 Number puzzles can be fun but they also can burn up your brain cells especially the 82 tantalizing math puzzlers found in this intriguing volume. Try them as party dares or make stump your friends bets.

**Challenging Math Problems** Terry Stickels, 2015-10-21 Fun and highly formidable math problems and puzzles from noted puzzle creator Terry Stickels. Window on Resources: Two friends wish to meet for breakfast twice a month throughout the year. In how many ways can they choose those two days so that they never meet on consecutive days? You want to measure 30 seconds and you have two pieces of string, each of which burns for 40 seconds. How can you accomplish this without bending, folding or cutting the strings? A positive whole number is divisible by 3 and also by 5. When the number is divided by 7, the remainder is 5. What is the smallest number that could work? These are but a few of this book's assembly of the most challenging puzzles imaginable and they require no background in higher math just good thinking skills. Terry Stickels, a well-known puzzle maker, has compiled 101 of some of the best and most entertaining problems ever published. All of the challenges, which range from probability puzzles to dice games, have two things in common: each offers the Aha moment of discovery that puzzle solvers love and they're all fun. Complete solutions for all puzzles explain every detail. [Without Words](#) James Tanton, 2021-07-30 All real life mathematics is problem solving. And all those fascinated by puzzles are problem solvers at heart. But thinking mathematically is a skill we have to learn and one which it is easy to forget. Recreational mathematicians and students can practise problem solving in different ways. In this book, solving puzzles is practised in a different way from most books they will have seen before. Readers get no clues to what the puzzle is about. They may take hours or even days to work out what is being asked of them. Even after that, some problems may have no solution. The result of this challenge is a really challenging book that will fascinate anyone interested in puzzles and recreational mathematicians in particular. This volume contains 36 puzzles, ranging from quite easy to more difficult. The sister volume, [More Without Words](#), Mathematical Puzzles to Confound and Delight, is also available, containing 36 more puzzles with more easy and fewer testing ones. **Solving Math Problems** Field Stone Publishers, 2008 [Math Puzzlers Grade 4](#) Wilai Crouch, William
