*New Directions in Analytical Political Economy* Amitava Krishna Dutt, 1994 New Directions in Analytical Political Economy brings together an important collection of economic research by scholars from a wide range of non neoclassical research traditions This book provides a flavour of recent research in non neoclassical economic theory drawing on classical Marxian post Keynesian and Kaleckian structuralist evolutionary and institutional approaches using mathematical analysis The papers deal with a variety of themes including unemployment financial crises and business cycles technological change and long run growth value prices and pricing and international terms of trade the role of agriculture foreign exchange and fiscal constraint on growth hyperinflation and wage indexation and stability in mixed economies The contributors base their analysis on the structure history and institutions at hand and not just on ever more elaborate optimizing principles as is fashionable in mainstream economics However they do not turn their backs on mainstream concepts and methods using formal mathematical models to conduct their analysis in a rigorous way Combining a broad approach to economics with mathematically based analysis this important new book will be welcomed by economists wanting to go beyond the boundaries of neoclassical economics without losing the rigour of modern economic theory      **The Media Essays** David Demers, 2003 Many scholars and citizens argue that global mass media are institutions that help political and economic elites around the

world achieve their goals often to the detriment of the less powerful and nonmainstream groups This book of essays supports that proposition but also shows that local mass media like the family owned Spokesman Review in Spokane Wash perform the same function for the communities they serve In other words all mainstream mass media perform a social control function for the communities or nations they serve The two dozen essays in this book are designed to be easy to read and many illustrate the social control function using real world examples Book jacket *School and Classroom Organization* Robert E.

Slavin,2013-03-07 Because the organization of the classroom and the school provide the framework for teaching and learning this important volume reviews research that focuses on specific issues including achievement effects of alternative school and classroom organizational practices ability grouping departmentalization special and remedial programs evaluation processes and class size The studies utilize realistic evaluations rather than laboratory or experimental data and do not prescribe particular practices **The Power in the Room** Jay Gillen,2019-09-24 How community centered peer to peer

youth knowledge exchanges are evolving into a strong economic and political foundation on which to build radical public education Following in the rich traditions in African American cooperative economic and educational thought teacher organizer Jay Gillen describes the Baltimore Algebra Project BAP as a youth run cooperative enterprise in which young people direct their peers and their own learning for a wage BAP and similar enterprises are creating an educational network of empowered employed students Gillen argues that this is a proactive political economic and educational structure that builds relationships among and between students and their communities It s a structure that meets communal needs material and social economic and political both now and in the future Through the story of the Baltimore Algebra Project readers will learn why youth employment is a priority how to develop democratic norms and cultures how to foster positive community roles for 20 30 year olds and how to implement educational accountability from below Mathematical Reviews ,2008
