### Match

Objects match when they are exactly the same as each other.

Talk about these autumn objects. What do you notice? Can you find pairs of objects that are the same? How do you know that they match? Can you point to two objects that are different?

Toby is sorting his autumn. He should have a matching pair of autumn in each colour. Talk about what you can see. Do you think Toby has all of his autumn? How do you know?

### Challenge Yourself

- Play a matching game using some pairs of socks. Can you find a matching pair? How do you know that they are the same?
- Can you fold the matching socks together into pairs? Are there any missing? How do you know?

### Sort

Objects can be sorted into sets in lots of different ways, such as by colour, shape or size.

Little Hedgehog is collecting autumn leaves to make a nest. Talk about how Little Hedgehog has sorted the leaves into sets.

Now Little Hedgehog has sorted the leaves in a different way. Look carefully at the leaves. Can you talk about how Little Hedgehog has sorted the leaves this time? What is the same about the leaves in each set?

### Challenge Yourself

- With a grown-up, go on an autumn walk and collect some autumn leaves.
- Can you find different ways of sorting your leaves into sets? Can your grown-up see ways that you've sorted your leaves?
- Show your sets and ask a grown-up to make one of the leaves in a different set. Can you spot which leaf is the odd one out?

### Compare Amounts

Sets of objects can be compared. When making comparisons, a set of objects can have...

Puffin, Kibble and Rusty have been collecting autumn. Look at the box frames and talk about what you notice.

Which squirrel found the most autumn? Who found the fewest autumn?

Squirrels came to show off his autumn. How many has he got?

Can you find two squirrels who collected the same number of autumn?

### Challenge Yourself
