*Digital Spectral Analysis* S. Lawrence Marple, Jr., 2019-03-20 Designed to offer a broad perspective on spectral estimations techniques and their implementation this text provides theoretical background and review material in linear systems Fourier transforms matrix algebra random processes and statistics 1987 edition Multichannel Time Series Analysis with Digital Computer Programs Enders Anthony Robinson, 1967 *Time Series Modelling of Water Resources and Environmental Systems* K.W. Hipel, A.I. McLeod, 1994-04-07 This is a comprehensive presentation of the theory and practice of time series modelling of environmental systems A variety of time series models are explained and illustrated including ARMA autoregressive moving average nonstationary long memory three families of seasonal multiple input single output intervention and multivariate ARMA models Other topics in environmetrics covered in this book include time series analysis in decision making estimating missing observations simulation the Hurst phenomenon forecasting experiments and causality Professionals working in fields overlapping with environmetrics such as water resources engineers environmental scientists hydrologists geophysicists geographers earth scientists and planners will find this book a valuable resource Equally environmetrics systems scientists economists mechanical engineers chemical engineers and management scientists will find the time series methods presented in this book useful Multichannel Time Series Analysis with Digital Computer Programs Enders A. Robinson, 1978 *Acoustical Imaging* Hua Lee, Glen Wade, 2012-12-06 How to produce images with sound has intrigued engineers and scientists for many years Bats whales and dolphins can easily get good mental images with acoustical energy but humans have little natural ability for obtaining such images The history of engineering and science however is an impressive demonstration that technological solutions can compensate and then some for deficiencies of nature in humans Thus with the proper technology we too can see with sound Many methods involving ultrasonic energy can be employed to enable us to do so Few of these methods are at all reminiscent of the acoustic systems employed by animals Pulse echo phase amplitude and amplitude mapping approaches constitute the conceptual bases for three fundamentally different types of acoustic imaging systems and can be used for categorizing the systems However by now systems exist that combine the approaches in such sophisticated ways as to make an unambiguous categorization of some of the more complicated systems difficult or impossible Among the instruments so far produced are mechanically scanning focused instruments chirped pulse echo instruments and instruments involving holography tomography parametric excitation phase conjugation neural networks random phase transduction finite element methods Doppler frequency shifting pseudo inversion Bragg diffraction and reflection and a host of other principles The fifty five chapters in this volume are selected from papers presented at the Eighteenth International Symposium on Acoustical Imaging which was held in Santa Barbara California on September 18 20 1989 *Synergetics of Measurement, Prediction and Control* Igor Grabec, Wolfgang Sachse, 2012-12-06 In this monograph a statistical description of natural phenomena is used to develop an information processing system capable

of modeling non linear relationships between sensory data The system based on self organized optimal preservation of empirical information applies these relationships for prediction and adaptive control This monograph is written for students scientists and engineers in academia and industry who are interested in experimental work related to the adaptive modeling of natural laws the development of sensory neural networks intelligent control synergetics and informatics No specific knowledge of advanced mathematics is presupposed Examples taken from physics engineering medicine and economics demonstrate the applicability of such intelligent systems
