Multicultural Education In Western Societies:

Multicultural Education in Western Societies James A. Banks, James Lynch, 1986 **The Concept of Multicultural Education in Western Societies and Its Relevance to Japanese Education** Ryoko Wada, 2000 It was determined that Japanese society is indeed a culturally diverse one that the cultural minorities are relatively small in numbers and that the Japanese government has traditionally followed a policy of the cultural assimilation of minorities Precarious International Multicultural Education: Hegemony, Dissent and Rising Alternatives Handel Kashope Wright, Michael Singh, Richard

Race, 2012-09-22 Multiculturalism and multicultural education are at a paradoxical moment. There is work that continues as if the multicultural hegemony was still intact and on the other hand work articulated as if multiculturalism was decidedly passe. The essays in this collection will be of considerable interest to academics, policy makers and students of both multiculturalism and multicultural education principally because they touch on both perspectives but concentrate for the most part on the thorny problematic of the workings of multicultural education in its present precarious moment. Given the renewed urgent attacks in various western countries the cottage industry of death of multiculturalism texts and the rise of the interculturalism/transnationalism/diaspora alternatives is multiculturalism dying? Are the ends of multiculturalism the management or celebration of diversity representation and recognition for all in society creation of just and equitable communities at the global, national and local school classroom levels better theorized and realized through the ascendant alternatives? Representing the precarious moment in Canada, Ireland, Australia, the United States and the United Kingdom the essays in this collection address these questions and both depict and trouble hegemonic multicultural education and contrast it with its supposed successor regimes

Global Citizenship Education and the Crises of Multiculturalism Massimiliano Tarozzi, Carlos Alberto Torres, 2016-08-11 The notion of global citizenship education (GCE) has emerged in the international education discourse in the context of the United Nations Education First Initiative that cites developing global citizens as one of its goals. In this book the authors argue that GCE offers a new educational perspective for making sense of the existing dilemmas of multiculturalism and national citizenship deficits in diverse societies taking into account equality, human rights and social justice. The authors explore how teaching and research may be implemented relating to the notion of global citizenship and discuss the intersections between the framework of GCE and multiculturalism. They address the three main topics which affect education in multicultural societies and in a globalized world and which represent unsolved dilemmas: the issue of diversity in relation to creating citizens, the issue of equality and social justice in democratic societies and the tension between the global and the local in a globalized world. Through a comparative study of the two prevailing approaches (intercultural education within the European Union and multicultural education in the United States) the authors seek what

can be learned from each model Global Citizenship Education and the Crises of Multiculturalism offers not only a unifying theoretical framework but also a set of policy recommendations aiming to link the two approaches **Education for All**
