## **Multilingualism And Nation Building:**

*Multilingualism and Nation Building* Gerda Mansour, 1993 This book is interdisciplinary drawing on the sociology and politics of language African linguistics African history and social history in general It focuses on the various issues related to multilingualism in West Africa but is also relevant to multilingual situations in Third World countries generally Although the book is aimed at the educated general reader it should also be of interest to language specialists and students of Third World politics

**Multilingualism and Nation Building** Gerda Mansour, 1993 The immediate concern of Multilingualism and Nation Building is to relate the phenomenon of multilingualism in West Africa to its historical social and physical environment and to trace the development of the sociolinguistic situation from the Middle Ages to the colonial and post colonial period At a deeper theoretical level the author attempts to show how the two types of communication monolingual and multilingual were associated with specific social formations in the course of socio historical evolution This perspective leads to a new evaluation of current sociolinguistic phenomena in independent African nations and examines their approach to the question of what role their native languages should play in national life While concrete answers to this question have to be left to policy makers it is the aim of this book to inquire into the linguistic social and political issues which result in a variety of possible solutions So far the decision to maintain a non native official language and to exclude native languages from the public domain has been the preferred option in many newly independent countries The author therefore analyses concrete examples of the two basic models of nation building the assimilationist or monolingual and the pluralist model and the conditions which made each of these solutions successful What really is at stake is the fundamental question what type of language policy for what type of nation

### **State-Building and Multilingual Education in Africa** Ericka A.

Albaugh, 2014-04-24 This book explains why many governments in Africa are including African languages alongside European languages as media of instruction in elementary schools It argues that a number of factors have combined to make multilingual education attractive France has changed its foreign policy toward its former colonies language NGOs are transcribing more languages and pressure toward democracy makes African leaders look for ways to divide the opposition

Citizenship, Nation-building and Identity in the EU Cherry James, 2018-12-17 With Brexit looming a major issue facing UK Higher Education is whether the UK will be able to stay in the Erasmus Programme This book sits at the intersection of three main interrelated themes EU citizenship the current state of the university in Europe and student mobility as they play out in the context of an EU funded programme established not least to promote European identity European consciousness and European citizenship Exploring through interviews with students from many countries this book weaves together the themes of citizenship creation as a device for building a nation and a polity the university as a public space in the era of the marketization of higher education and communicative interaction as the mechanism by which citizenship is created Ultimately it asks if the building bricks of national citizenship can be transposed to the transnational scale and assist in

creating the transnational EU citizenship It finds surprisingly that far from encouraging and facilitating the communicative interaction on which the development of EU citizenship was postulated central features of the Erasmus Programme inadvertently work against this outcome This book will be of key interest to scholars and students of EU law and European and EU studies Citizenship Studies sociology and more broadly to higher education in general

**Community and Communication** Sue Wright, 2000-01-01 This book considers the issue of language in the European Union Without a community of communication the EU must remain a trading association run in an autocratic way by bilingual patrician technocrats with a community of communication the European Union could develop democratic structures and legitimacy and give meaning to its policies of free movement How to achieve that community of communication is the biggest challenge facing Europe today

*Language, Nations, and Multilingualism* Ying-Ying Tan, Pritipuspa Mishra, 2020-12-30 *Language Nations and Multilingualism* explores the legacy of Herder's ideas about the relationship between language and nationalism in the post colonial world Focusing on how anti colonial and post colonial nations reconcile their myriad multilingualisms with the Herderian model of one language one nation it shows how Herder's model is both attractive and problematic for such nations Why then does the Herderian model have such valency How has the Herderian ideal of one nation one language continued to survive beneath the uncomfortable resolution struck by new multilingual nations as they create fictions of a singular national mother tongue To what extent is Herder still relevant in our contemporary world How have different nations negotiated the Herderian ideal in different ways What does the way in which multilingual post colonial nations deal with this crisis tell us about a possible alternative framework for understanding the relationship between language and nation By approaching this investigation from diverse archives across Asia Africa Europe Latin America and the Caribbean *Language Nations and Multilingualism* proposes answers to the aforementioned questions from a global perspective that takes into account the specificities of a range of colonial experiences and political regimes And by extending the discussion backwards in time to offer a more historical reading of the making of modern nations it allows us to see how multilingualism has always disrupted constructions of monoglot nations

**Multilingualism in Education in Nepal** Laxman Ghimire, 2021-07-22 This book explores the development of multilingual policy in education in Nepal in sociopolitical and historical contexts and examines the frameworks of language use in schools It investigates the dynamics and factors that influence the process of construction and appropriation of the policy of multilingualism in education The book surveys the language situation in schools and discusses how it is impacted by local language positions societal power relations ideological and identity contestations and the attitude language behaviour and resistance of key actors It highlights the role of pedagogy linguistics and politics that govern the policy of multilingual education The author assesses the prospects of a multilingual approach to learning via teacher preparation curriculum and learning material development coordination of actors and institutions and resources available in schools The book presents Nepal's linguistic background while discussing

how multilingualism in education recognises local languages to improve the quality of learning in classrooms in ethnolinguistic communities Evaluating the use of local languages in classrooms it explores monolingual multilingual and language maintenance frameworks of multilingualism in education This book will be of interest to teachers students and researchers of education and educational studies linguistics sociology of education school education language studies sociolinguistics language policy and planning public administration ethnolinguistics and sociology of language It will also be useful to educationists policymakers linguists sociolinguists and those working in related areas **Hidden**

**Multilingualism in 19th-Century European Literature** Jana-Katharina Mende,2023-08-21 The disparagement of multilingualism is a European development of the 18th and 19th centuries in which one national language and national literature were advocated established and institutionalised Multilingual writers made use of the creative potential of several languages even then However they often adapted to an increasingly monolingual book market which made their individual multilingualism invisible This is evident in literary historiography which established a monolingual national canon Researching hidden multilingualism is often difficult since multilingual texts by multilingual writers were often not published or were published in a monolingual version sources are scarce Literary histories of the time often do not mention multilingualism Furthermore many multilingual writers were members of minority groups women Jewish Non European and thus often neglected The volume offers methods and theories to systematically approach this hidden material as well as case studies on authors and national literatures in a multilingual context It thus contributes to the restructuring of a multilingual transnational literary history that is applicable to different philologies **Thematising Multilingualism in the Media**

Helen Kelly-Holmes,Tommaso M. Milani,2013-06-12 This volume analyses the complex relations between multilingualism and the media how the media manage multilingualism how multilingualism is presented and used as media content and how the media are discursive sites where debates about multilingualism and other language related issues unfold It is precisely this inter relatedness that we want to flag up when we talk about thematising multilingualism in the media More specifically the focus of this volume is on the empirical and theoretical opportunities and challenges posed by the thematisation of multilingualism in the media The volume originally published as a special issue of the Journal of Language and Politics 10 4 2011 presents a number of case studies from a variety of linguistic media political social and economic contexts from print media debates on trilingual policies in Luxembourg to new media discussions about the sexiness of Irish or the national value of Welsh from issues of linguistic authority and authenticity in an American television programme to Wikipedia s multilingual policy and practice **Bilingualism and National Development**

Gary M. Jones,A. Conrad K. Ozóg,1993 The majority of cases in this book lean towards those countries which view bilingualism as a positive sometimes necessary feature of national development **Multilingualism and Government** Kas Deprez,Theo Du Plessis,2000 Provides case studies on the way in which governments deal with societal multilingualism in countries such as Belgium Switzerland Luxembourg and the former

Yugoslavia in comparison with South Africa This text focuses primarily on language policy and language legislation in these countries

**Competitive Nation-building in Timor-Leste** Andre Borgerhoff,2012

**Language Policy and Nation-Building in Post-Apartheid South Africa** Jon Orman,2008-08-27 The preamble to the post apartheid South African constitution states that South Africa belongs to all who live in it united in our diversity and promises to lay the foundations for a democratic and open society in which government is based on the will of the people and every citizen is equally protected by law and to improve the quality of life of all citizens This would seem to commit the South African government to amongst other things the implementation of policies aimed at fostering a common sense of South African national identity at societal development and at reducing of levels of social inequality However in the period of more than a decade that has now elapsed since the end of apartheid there has been widespread discontent with regard to the degree of progress made in connection with the realisation of these constitutional aspirations The limits to liberation in the post apartheid era has been a theme of much recent research in the fields of sociology and political theory e g Luckham 1998 Robins 2005a Linguists have also paid considerable attention to the South African situation with the realisation that many of the factors that have prevented and are continuing to prevent effective progress towards the achievement of these constitutional goals are linguistic in their origin

*Problems of Multilingual Nations* Chris U. Agbedo,2007

**Multilingualism, Education and Social Integration** Pol Cuvelier,Theo Du Plessis,Lut Teck,2003 This is a title for educationists language planners and managers in education researchers and students preparing for a career in education Language in education policy is probably one of the most contested issues in multilingual countries

**Language, Nation and Power** R. Millar,2005-08-05 Language Nation and Power provides students with a discussion of the ways in which language has been and is being used to construct national or ethnic identity It focuses on the processes by which a language can be planned and standardized and what the results of these processes are Particular emphasis is given to the historical and social effects which nationalism has had on the development of language since the French Revolution For students of linguistics sociology and politics

**The Politics of Multilingualism and Language Planning** Cercle linguistique de Belge. Journée,1996

Critical Polyglot Studies Carlos Yebra López,Usman W. Chohan,2025-01-16 This book offers a self reflective critical approach to the study of what is popularly known as polyglossia charting the gradual but marked process of its commoditization over the last 20 years and offering a counterpoint to mainstream positivist treatment of serial language learning First from a diagnostic standpoint the book examines the rise and consolidation of the Polyglot Community in the sociopolitical and economic context of its gradual transformation into and partial overlap with the Polyglot Industry and its ideological tenets the Polyglot Matrix Second from a prognostic standpoint the book posits Critical Polyglot Studies CPS as a much needed counter to the many theoretical and practical shortcomings of the Polyglot Industry cum Matrix presenting the main programmatic points and illustrative best practices and institutional case studies of this alternative paradigm CPS is conceived as both a research

orientation and as a strategic attempt to elicit debate and draw in a wider range of polyglossia scholars offering readers with actionable tools to contribute to this emerging academic and activist endeavor Constituting the first critical and systematic analysis of polyglossia as a globalized phenomenon this book will be of interest to scholars of linguistics cultural studies critical theory and sociology Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution NonCommercial NoDerivatives CC BY NC ND 4.0 International license

**Towards Global Multilingualism** Rosemary Khoo, Ursula Kreher, Ruth Wong, 1994 The book brings together a variety of articles from Europe and Asia in order to raise questions about the applicability of European models of bilingualism and bilingual education to the linguistic social and educational realities of Singapore Malaysia and Brunei The result is a profound rethinking of accepted views concerning multilingualism in Europe and worldwide In particular many of the contributors raise doubts about the applicability of widely held views on language pedagogy associated with the teaching of English as a foreign language and the so called communicative approach to language learning to the Asian reality

Language and Identities in a Postcolony Rosalie Finlayson, Sarah Slabbert, 2005 The book's chapters address issues that are important not only in Southern Africa but also in other parts of the world Although the focus and much of the data on language and identity are Southern African most of the writers deal with their material in such a way as to locate it within theoretical debates and/or illuminate it with insights from related research in other parts of the world The collection belongs to the constructivist paradigm and is one of the few works within this line of research The issue of language and identity examines how language can become symbolic of the individual or group's identity This aspect of language is explored from a variety of angles exhibiting different methods of investigation and this smorgasbord of methods provides ample inspiration for further studies in the field
