Multinationals and Foreign Investment in Economic Development E. Graham,2005-04-28 During the past twenty or so years foreign direct investment FDI flows have increased at rates approaching the astounding especially so during the 1990s While much of the increase was due to unprecedeted cross border mergers and acquisitions among high income countries the amount of FDI flowing to developing nations also grew substantially This volume examines the economics of this FDI to developing countries Some chapters are theoretical in nature others empirical and still others are largely policy oriented Topics covered include whether FDI makes an autonomous contribution to growth in these nations and whether or not spillovers are generated by this investments Also covered are effects of policy intervention by governments on FDI flows and whether non economic factors e g cultural factors might figure as determinants of location of FDI

[Local versus Global Logic](#) Rick Molz, Catalin Ratiu, Ali Taleb, 2010-07-21. A key distinctive feature of Multinational Enterprises MNEs as organizations resides in the fact that they span across borders. This exposes them to dissimilar and often unfamiliar social and economic conditions as they venture in foreign countries. MNEs from industrialized economies that are active in developing countries and emerging markets face particularly challenging hurdles due to both economic and institutional discrepancies between their home and host countries. This book focuses on the uneasy interaction between the traditional logics of developing countries and the economic logic of MNEs. The traditional logics of most developing countries are built around community based legitimacy and an intuitive but concrete epistemology. Conversely the economic logic of MNEs from developed economies is built around technical and economic legitimacy and an abstract intellectual epistemology. Unpacking the uneasy interactions between these two logics will help achieve MNEs objectives of competitiveness in developing countries as well as globally. The Montreal Local Global Research Group is a well recognized research group in formulating and researching local and global issues in strategic management from the perspective of integrating divergent dominant logics into the strategy conceptualization process and this will be the first book to be dedicated to the study of the interaction between the traditional logic of developing country and the economic logic of Multinational Enterprise MNE. The cultural diversity of the contributing authors and the multidisciplinary approach offers a fresh perspective from which to explore beneficial corporate and local strategies that promote long term economic growth consistent with local traditional and cultural norms. This collection will be primarily of interest to scholars of international business, international development and economics. Furthermore this book is immediately relevant to decision makers in Multinational corporations, NGOs and political decision makers that mediate the interaction between local actors and corporate agents in developing and transitional economies.

It contains a clear and comprehensive conceptualisation of public policy on MNE allowing the classification and evaluation of country policies. The author supplies a vast amount of institutional policy details and

economic data which are interesting in their own right Thorsten Posselt Kyklos **Multinational Enterprises, International Trade, and Productivity Growth** Wolfgang Keller, Stephen R. Yeaple, 2003-12-01 We estimate international technology spillovers to US manufacturing firms via imports and foreign direct investment FDI between 1987 and 1996. In contrast to earlier work our results suggest that FDI leads to substantial productivity gains for domestic firms. The size of FDI spillovers is economically important accounting for about 11 percent of productivity growth in US firms between 1987 and 1996. In addition there is some evidence for import related spillovers but it is weaker than for FDI spillovers. The paper also gives a detailed account of why our study leads to results different from those found in previous work. This analysis indicates that our results are also likely to apply to other countries and periods **The Future of the Multinational Enterprise, 2nd ed** Peter J. Buckley, Mark Casson, 2016-07-27 This book presents a new approach to the analysis of the multinational enterprise one of the most important institutions in the world economy. With a new introduction the analysis is brought firmly up to date Economic Analysis and the Multinational Enterprise John H. Dunning, 1974-01-01 With an array of international contributors from the UK USA Sweden and Peru this book includes chapters on the nature of the multinational enterprise the theory of the firm and the location of economic activity to name but a few **Multinational Enterprises and the Global Economy** John H. Dunning, Sarianna M. Lundan, 2008-01-01 For many years to come this volume is surely going to be the ultimate reference work on international business thanks to Dunning and Lundan have at their disposal a wealth of relevant data as well as theoretical and empirical analyses which will enable them to assess the capabilities contributions and challenges posed by the multinational enterprises to the global economy. *Seev Hirsch International Business Review* Multinational Enterprises and the Global Economy has become a classic in international business. Yet the book's second edition is even better than the first in part because of Professor Dunning's wise decision to choose Dr Lundan as his co author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. In addition to being a remarkably useful reference book Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. *Alain Verbeke Journal of International Business Studies* The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. *Journal of International Business Studies* This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. *Alan M Rugman University of Reading UK* The rise of the multinational enterprise and the consequent globalisation of the world economy was arguably

the single most important phenomenon of the second half of the twentieth century This magisterial book written by two leading authorities examines this phenomenon in depth It explains how foreign investment by multinationals diffused advanced technologies and novel management methods driving productivity growth in Europe Asia and North America however economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones This new edition of a classic work is not only an authoritative guide to contemporary multinational business but a major historical resource for the future Mark Casson University of Reading UK This thoroughly updated and revised edition of a widely acclaimed classic text will be required reading for academics policymakers and advanced students of international business worldwide Employing a distinctive and unified framework this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity and its effects on the economic and social well being of developed and developing countries Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs and the role of MNE activity in transmitting and facilitating institutional change Since the initial publication of this book more than a decade ago the economic managerial and social implications of globalisation and technological advancement have become even more varied and prominent Accompanying these developments there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever changing physical and human environment Drawing on articles and books from international business and economics as well as economic geography political economy and strategic management a systematic overview of the developments in scholarly thinking is present
