**The Good Person** Stephen Gislason,2018-06-01 The Good Person Ethics and Morality Ethics is about the interface between selfish interests and actions and the common good Both the good and the bad tendencies of mindbodybrain are innate properties that have useful functions were not invented by modern society and are not going to change until the construction of brain changes The dialogue between good and bad in human affairs is constant predictable and universal When a baby is born the family and local community begin to teach the emerging being what is going on here and now They provide the local language costumes customs beliefs and the local science and technology All adult humans have a n ethical standard and a technology to teach While the local culture has an obvious impact on the appearance and behavior of emerging adults the constant innate features of the human mind are pervasive and persistent The variance in mental abilities within a local group will often be greater than inter group variance Ethics are about standards and rules of conduct or more precisely modern ethicists attempt to decide what good and reasonable behavior is All humans make decisions and evaluate the behavior of others A scale of evaluations from right to wrong is typical of ethical judgments Each group develops norms to guide actions and judgments about behavior The presence of ethical standards requires individuals who can anticipate the consequences of actions evaluate consequences in terms of selfish and of group interests and who have the ability to choose between alternative courses of action In practice professional ethicists are

employed by governments universities hospitals and other organizations they do best by examining specific situations and engaging the people involved in conversations about specific interactions When behavior and or decisions are questionable but laws have not been broken Ethics committees substitute for judges or juries and deliver advice or judgments The value of ethics decreases as issues become of more general importance or are issues of law Professional ethics can be appreciated as an abstract exercise in description and reasoning that may fail to appreciate the deep determinants of human feelings beliefs and conduct This inquiry is about human nature complete with descriptions of imbedded social regulation and morality An understanding of all these discussions is required for meaningful ethical discourse     **The Official Rules for Golfers** Paul Dickson,1999
