Streams of Consciousness Christopher Bollas,2024-09-26 In Christopher Bollas Streams of Consciousness a wide spectrum of theory and practice are explored sometimes appearing in simple fragments sometimes via complex lines of thinking that are developed in detail over time As Bollas revisits the received truths and dogmas of his profession including his own prejudices he demonstrates the value of open intelligent uncertainty Interspersed with clinical preoccupations which highlight the richness as well as the bewildering complexity of psychoanalysis we find other ideas that reflect his early life as political activist literature professor and cultural critic Throughout the notebooks are enriched by references to the work of numerous writers in many fields who have influenced his thinking This work is essential reading for all with an interest in psychoanalysis which will enrich both academic study and clinical practice *Journey Beyond Love* Ashish Chand, It is necessary to know about functionality of your physiological and psychological body parts in order to have any wholesome understanding about your life Does this statement have any meaning for you If being wholesome is being holy then what is the Journey to it In all the cultures of the world but Hinduism there is no concept of rebirth Only an Indian has to work for stopping his cycle of rebirths Does liberation comes to all people but Indians automatically Is it so that what is almost impossible to achieve for an Indian is most certainty available to all non Indians What is the life beyond love

Multidimensional Man Lives in a Multidimensional Reality Reynaldo Pareja, 2021-11-18 Is reality what we see at first glance when we observe something This might sound as a senseless question Obviously what we see is real Any object that enters in our field of perception is an objective reality that has weight density it is also inert or alive But are there other levels of reality that are equally valid and real as the level observed at first sight When we make this question we realize that it has meaning because science has taught us is that total reality is not the one we perceive at first glance It suffices to look below its external surface to discover a hidden reality not observable at first glance One question normally opens the door to other questions If this is true one can ask Why is it important for me to become aware of those levels of reality if the immediate one is sufficient for my daily performance How does this question help to clarify why we are designed the way we are The latter question immerses us immediately in the field of meaning the why of things and events This is another level of personal reality that we must investigate if we want to obtain the full picture of what we claim is real This is the intention of this essay to explore the different levels of objective and subjective reality in order to obtain a holistic perspective of ourselves and the world we live in so that we can accept its diverse levels of reality at the same time that we give it the respect it deserves so that all of us can share and live on Earth our one country

Does God Exist? Hans Kung, 2006-09-22 Does God exist Who is God And can we ultimately trust in any reality These questions have been among the greatest subjects of human speculation since history began but not until modern times has the reality of God been so strongly called into doubt In this monumental study written for men and women of all faiths and of none Hans K ng the most renowned and controversial theologian in the world today first traces the rise of modern atheism in the works of such great thinkers as Descartes Pascal Feuerbach Marx Nietzsche and Freud and then demonstrates brilliantly and in terms that make sense to us today why a yes to God remains a more reasonable and responsible belief than its alternative nihilism
