Multidimensional Terrorism:

Tales of Terror Bethami A. Dobkin, 1992-04-20 Conventional research suggests that news coverage of terrorism is a tool of the terrorist to gain public support and recognition Based on an analysis of more than 200 evening newscasts aired during the first six years of the Reagan administration Tales of Terror offers a detailed account of the ways in which news media escalate public panic about terrorism and encourage support for specific U S policy objectives rather than build sympathy for terrorists Bethami Dobkin explores similarities between news media and government portrayals of terrorism combining textual criticism with an interpretation of official U S policy statements and argues that government depictions and news presentations of terrorism reproduce an ideology that supports military strength and intervention Dobkin examines several specific features of news coverage the dramatic format of television news and the political interests that this format serves the narrative construction of enemies by television journalists and public officials and the political significance of the terrorist label the use and significance of testimony particularly that of people affected by crisis the mutual exploitation of political crisis by both television news producers and public officials the function of journalism in shaping the conduct of public diplomacy and public perceptions of foreign conflict and the creation of consensus about the need for military responses to political violence This revealing study will be of particular interest to scholars of communications and political science

Detention in the 'War on Terror' Fiona de Londras, 2011-07-28 In this book Fiona de Londras presents an overview of counter terrorist detention in the US and the UK and the attempts by both states to achieve a downward recalibration of international human rights standards as they apply in an emergency Arguing that the design and implementation of this policy has been greatly influenced by both popular and manufactured panic Detention in the War on Terror addresses counter terrorist detention through an original analytic framework In contrast to domestic law in the US and UK de Londras argues that international human rights law has generally resisted the challenge to the right to be free from arbitrary detention largely because of its relative insulation from counter terrorist panic She argues that this resilience gradually emboldened superior courts in the US and UK to resist repressive detention laws and policies and insist upon greater rights protection for suspected terrorists

Terrorism in the Twenty-first Century Cindy C. Combs, 2000 For undergraduate level courses in Political Violence Terrorism and Criminal Justice Unbiased in perspective this text 1 examines the known facets of contemporary terrorism explaining what terrorism is who carries it out how terrorist acts are committed 2 analyzes the laws and special forces which nations within the international community have created to meet this challenge and 3 predicts forthcoming patterns of terrorism in the new century Post Cold War in focus and written specifically for undergraduate students it helps them

evaluate the dimensions of the problems presented by contemporary terrorism and challenges them to develop solutions
