Multimedia Lecture Presentation System:

Multimedia Systems and Techniques Borko Furht, 2012-12-06 Multimedia computing has emerged in the last few years as a major area of research. Multimedia computer systems have opened a wide range of applications by combining a variety of information sources such as voice, graphics, animation, images, audio, and full motion video. Looking at the big picture, multimedia can be viewed as the merging of three industries: computer communications and broadcasting industries. Research and development efforts can be divided into two areas. As the first area of research, much effort has been centered on the stand-alone multimedia workstation and associated software systems and tools such as music composition, computer-aided education and training, and interactive video. However, the combination of multimedia computing with distributed systems offers even greater potential. New applications based on distributed multimedia systems include multimedia information systems, collaborative and video conferencing systems on demand, multimedia services, and distance learning. Multimedia Systems and Techniques is one of two volumes published by Kluwer, both of which provide a broad introduction into this fast-moving area. The book covers fundamental concepts and techniques used in multimedia systems. The topics include multimedia objects and related models, multimedia compression techniques and standards, multimedia interfaces, multimedia storage techniques, multimedia communication and networking, multimedia synchronization techniques, multimedia information systems, scheduling in multimedia systems, and video indexing and retrieval techniques. Multimedia Systems and Techniques, together with its companion volume Multimedia Tools and Applications, is intended for anyone involved in multimedia system design and applications and can be used as a textbook for advanced courses on multimedia.

Multimedia, Hypermedia, and Virtual Reality: Models, Systems, and Application Peter Brusilovski, Piet Kommers, Norbert Streitz, 1996-05-15 This volume contains a thoroughly refereed collection of revised full papers selected from the presentations at the First East West International Conference on Multimedia, Hypermedia, and Virtual Reality (MHVR 94) held in Moscow, Russia, in September 1994. The 22 full papers presented in the book were selected from a total of 76 initial submissions and have been carefully updated for publication. Also included are two invited papers and summaries by the session chairpersons. The volume is organized in chapters on hypermedia models and architectures, enhancing multimedia support, new technologies for virtual reality, hypermedia and multimedia for group collaboration, hypermedia and multimedia for learning, and personalized hypermedia.

Multimedia Technologies: Concepts, Methodologies, Tools, and Applications Syed, Mahbubur Rahman, 2008-06-30 This book offers an in-depth explanation of multimedia technologies within their many specific application areas as well as presenting developing trends for the future. Provided by publisher.

Video Data Management and Information Retrieval Sagarmay Deb, 2005-01-01 This book combines the two important areas of research within computer technology and presents them in a comprehensive, easy-to-understand manner. Ideal for graduates and under-graduates as well as researchers working in either video data management or information retrieval, it

takes an in depth look at many relevant topics within both video data management and information retrieval In addition to dissecting those issues it also provides a big picture view of each topic **Encyclopedia of Distance Learning** Howard, Caroline,Boettcher, Judith V.,Justice, Lorraine,Schenk, Karen D.,Rogers, Patricia L.,Berg, Gary A.,2005-04-30 This encyclopedia offers the most comprehensive coverage of the issues concepts trends and technologies of distance learning More than 450 international contributors from over 50 countries Provided by publisher **Multimedia Systems and Applications II** Andrew G.
