Multimedia Communications Protocols And Applications:

Multimedia Communications Fred Halsall,2001 This book addresses the main subject areas associated with multimedia communications applications networks protocols and standards at a level that enables the reader to develop an in depth understanding of the technical issues associated with this rapidly evolving subject It is an updated approach to the author's Data Communications Computer Networks and Open Systems Fourth Edition set in the context of the increasingly important area of multimedia The book identifies the different types of multimedia applications quantifies their communication requirements and describes the operation and protocols of the different kinds of networks that are used to support them These networks include LANs the Internet and World Wide Web and home entertainment networks such as cable and satellite It also includes coverage of the main compression algorithms used with text images speech audio and video This book is suitable for programmers interested in learning the integral multimedia aspects of networked communications

Multimedia Communications Franklin F. Kuo,Wolfgang Effelsberg,J. J. Garcia-Luna-Aceves,1998 Here is the network specialist's complete guide to planning and deploying multimedia on the Internet Intranets and any networked environment The title covers everything LAN and WAN professionals need to know to prepare for and deploy networked multimedia

Introduction to Multimedia Communications Kamisetty Rao,Zoran Bojkovic,Dragorad Milovanovic,2006-02-02 A comprehensive resource on multimedia communications Covers recent trends and standardization activities in multimedia communications such as layered structures underlying theories and the current best design techniques Describes the convergence of various technologies including communications broadcasting information technology and home electronics and emerging new communication services and applications resulting from the growth of the Internet and wireless technologies Please go to www.ee.uta.edu/dip for additional information

Multimedia Communication Luca Delgrossi,2012-12-06 The advent of multimedia technology is creating a number of new problems in the fields of computer and communication systems Perhaps the most important of these problems in communication and certainly the most interesting is that of designing networks to carry multimedia traffic including digital audio and video with acceptable quality The main challenge in integrating the different services needed by the different types of traffic into the same network an objective that is made worthwhile by its obvious economic advantages is to satisfy the performance requirements of continuous media applications as the quality of audio and video streams at the receiver can be guaranteed only if bounds on delay delay jitters bandwidth and reliability are guaranteed by the network Since such guarantees cannot be provided by traditional packet switching technology a number of researchers and research groups during the last several years have tried to meet the challenge by proposing new protocols or modifications of old ones to make packet switching networks capable of delivering audio and video with good quality while carrying all sorts of other traffic The focus of this book is on HeiTS the Heidelberg Transport System and its contributions to integrated services

network design The HeiTS architecture is based on using the Internet Stream Protocol Version 2 ST II at the network layer The Heidelberg researchers were the first to implement ST II The author documents this activity in the book and provides thorough coverage of the improvements made to the protocol The book also includes coverage of HeiTP as used in error handling error control congestion control and the full specification of ST2 a new version of ST II The ideas and techniques implemented by the Heidelberg group and their coverage in this volume apply to many other approaches to multimedia networking

Multicast Communication Ralph Wittmann,Martina Zitterbart,2000-06-16 The Internet is quickly becoming the backbone for the worldwide information society of the future Point to point communication dominates the network today however group communication using multicast technology will rapidly gain importance as digital audio and video transmission push technology for the Web and distribution of software updates to millions of end users become ubiquitous Multicast Communication Protocols and Applications explains how and why multicast technology is the key to this transition This book provides network engineers designers and administrators with the underlying concepts as well as a complete and detailed description of the protocols and algorithms that comprise multicast Presents information on the entire range of multicast protocols including PIM SM MFTP and PGM and explains their mechanisms trade offs and solid approaches to their implementation Provides an in depth examination of Quality of Service concepts including RSVP ST2 IntServ and DiffServ Discusses group address allocation and scoping Discusses multicast implementation in ATM networks Builds a solid understanding of the Mbone and surveys the successes and current limitations of real multicast applications on the Internet such as videoconferencing whiteboards and distance learning

High Speed Networks and Multimedia Communications Zoubir Mammeri,Pascal Lorenz,2004-06-17 This book constitutes the refereed proceedings of the 7th IEEE International Conference on High Speed Networking and Multimedia Communications HSNC 2004 held in Toulouse France in June July 2004 The 101 revised full papers presented were carefully reviewed and selected from 266 submissions The papers are organized in topical sections on quality of service QoS DiffServ and performance analysis scheduling and resource allocation MPLS routing and multicast mobile networks mobile IP 3G UMTS IEEE 802 11 networks and ad hoc networks wireless and WLAN optical networks and WDM applications and software development and security and privacy

Information Processing and Network Provisioning Michel Kadoch,Mohamed Cheriet,Xuesong Qiu,2025-07-21 The four volume set CCIS 2416 2417 2418 and 2419 constitutes the refereed post conference proceedings of the Third International Conference on Information Processing and Network Provisioning ICIPNP 2024 Spring held in Beijing China during June 14 16 2024 The 152 revised full papers presented in these proceedings were carefully reviewed and selected from 347 submissions They focus on topics ranging from 5G 6G evolution and AI in network optimization to quantum communication and green computing
