Virtual Environments '95 Martin Göbel, 2012-12-06 Virtual

Environments VE the new dimension in man machine communication have been developed and experienced in Europe since 1990 In early 1993 the Eurographics Association decided to establish a working group on Virtual Environments with the aim to communicate advances in this fascinating area on a scientific and technical level In September 1993 the first workshop on VEs was held in Barcelona Spain in conjunction with the annual Eurographics conference The workshop brought together about 35 researchers from Europe and the US The second workshop was held together with Imagina 95 in Monte Carlo Monaco This time around 40 researchers from Europe the US but also from Asia met for a 2 day exchange of experience Needless to say as in all Eurographics workshops we found the atmosphere very open and refreshing The workshops were sponsored by ONR Office of Naval Research UK US Army Research Institute UK University of Catalonia Spain EDF France CAE France INA France and IGD Germany and locally organized by Daniele Tost and Jaques David While in the first workshop in 1993 many concepts in VE were presented the 95 workshop showed up various applications in different areas and demonstrated quite clearly that Virtual Environments are now used in interactive applications

*Design, Specification and Verification of Interactive Systems '95* Philippe Palanque, Remi Bastide, 2012-12-06 This book is the final outcome of the Eurographics Workshop on Design Specification and Verification of Interactive Systems that was held in Bonas from June 7 to 9 1995 This workshop was the second of its kind following the successful first edition in Italy in 1994 The goal of this ongoing series of meetings is to review the state of the art in the domain of tools notations and methodologies supporting the design of Interactive Systems This acknowledges the fact that making systems that are friendlier to the user makes the task ever harder to the designers of such systems and that much research is still needed to provide the appropriate conceptual and practical tools The workshop was located in the Chateau de Bonas in the distant countryside of Toulouse France Tms location has been selected to preserve the quiet and studious atmosphere that was established in the monastery of Santa Croce at Bocca di Magra for the first edition and that was much enjoyed by the participants The conversations initiated during the sessions often lasted till late at night in the peaceful atmosphere of the Gers landscape

*Visualization in Scientific Computing '95* Riccardo Scateni, Jarke J. van Wijk, Pietro Zanmarini, 2012-12-06 Visualization is nowadays indispensable to get insight into the huge amounts of data produced by large scale simulations or advanced measurement devices The use of computer graphics for scientific purposes has become a well established discipline known as Scientific Visualization Many problems still have to be solved and hence the field is a very active area for research and development This book represents results of the sixth in a well established series of international workshops on Visualization in Scientific Computing organized by the EUROGRAPHICS Association in collaboration with CRS4 Center for Advanced Studies Research and Development in Sardinia held from May 3 to May 5 1995 in Chia Italy The thirteen contributions selected for this volume cover a wide range of topics ranging from detailed algorithmic studies to searches for new metaphors A rough division can

be made into the parts interaction irregular meshes volume rendering and applications Interaction in three dimensions is a challenging area for research The use of three dimensional user interfaces for more natural manipulation of three dimensional data and their visualization is natural but is far from trivial to realize Pang et al investigate the use of common objects such as spray cans and carving knives as metaphors for visualization tools in order to provide an intuitive and natural three dimensional user interface Gibson uses a voxel based data representation not only for visualization but also for physical modeling of objects A prototype system under development for haptic exploration is discussed
