Cem Sarica, Garry A. Gregory, 2002 **Non-Newtonian Flow and Applied Rheology** R. P. Chhabra, Swati A. Patel, 2025-03-01 Non Newtonian Flow and Applied Rheology Engineering Applications Third Edition bridges the gap between the theoretical work of the rheologist and the practical needs of those who have to design and operate the systems in which these materials are handled or processed This new edition addresses the rapid advances that are occurring in all aspects of the topics covered in this book such as new measurement techniques or new constitutive equations and more reliable information based on numerical simulations New solved examples are added in each chapter along with a list of problems at the end of the book This is an established and important reference for senior level mechanical engineers chemical and process engineers as well as any engineer or scientist who needs to study or work with these fluids including pharmaceutical engineers mineral processing engineers medical researchers water and civil engineers Extensively revised and expanded with material on new measurement techniques new constitutive equations and information based on numerical simulations Covers both basic rheology and fluid mechanics in non Newtonian fluids making it a truly self contained reference for anyone studying or working with the processing and handling of fluids Provides solved examples to illustrate and or aid understanding of the concepts Written by a world s leading expert in an accessible style **Mechanical and Electro-chemical Interactions under Tribocorrosion** Pierre Ponthiaux, Jean-Pierre Celis, 2021-08-22 Mechanical and Electro chemical Interactions under Tribocorrosion From Measurements to Modelling for Building a Relevant Monitoring Approach looks at progress in the field of tribocorrosion The work is a result of the efforts of the European tribocorrosion community gathered under the auspices of the European Corrosion Federation EFC within WP18 Tribocorrosion In addition to the handbook Testing Tribocorrosion of Passivating Materials Supporting Research and industrial Innovation published in 2012 this release describes the latest scientific approaches recognized and validated experimentally to address tribocorrosion Sections look at the phenomena of coupling through an understanding of the associated mechanisms and how to identify variables Final sections cover strategies to control and or extend the life of structures in a multi process coupling situation and an in depth description of the current state of the art on modeling approaches of tribocorrosion Reviews the multidisciplinary basics of tribocorrosion Includes insights into novel experimental approaches Provides insights into advanced modeling techniques of tribocorrosion Looks at the implication of results in the development of the monitoring of tribocorrosion **Defects and Diffusion, Theory & Simulation II** David Fisher, 2010-12-23 This second volume in a new series covering entirely general results in the fields of defects and diffusion includes 356 abstracts of papers which appeared between the end of 2009 and the end of 2010 As well as the abstracts the volume includes original papers on theory simulation semiconductors and metals Predicting Diffusion Coefficients from First Principles Mantina Chen Liu Gouge
