Kornhaber,Edward Garcia Fierros,Shirley A. Veenema,2004 Based on a national investigation of more than 40 schools in the US and on detailed case studies this book shows how teachers in six real life situations were able to construct and implement curricula that enabled students to learn challenging disciplinary content through multiple intelligence *Becoming a Multiple Intelligences School* Thomas R. Hoerr,Noreen Carol Rolheiser-Bennett,2000 Describes the challenges and difficulties of transforming a school into a Multiple Intelligences school and provides advice for educators in making significant changes to curriculum development and assessment *Becoming a Multiple Intelligences School* Thomas R. Hoerr,2000-02-15 In this invaluable book Tom Hoerr relates a decade s worth of MI experiences at St Louis New City School We learn about the staff s initial exposure to MI theory the many activities some more successful than others that were undertaken by faculty and staff in teaching curriculum adult development and assessment the challenges that the leader faces in attempting to bring about significant and lasting change Especially compelling are the continuing efforts to develop the personal intelligences during a period when issues of diversity multiculturalism and standards loom so large Hoerr underscores the centrality of collegiality the problems posed by transient students and faculty the complementary role played by public exhibitions and standardized test scores the role of friends in determining the activities and intelligences favored by children the delicate line between support and challenge that the leader must walk the tension between excellence and perfection I value the concrete examples as well as the ties to important conceptual work such as that undertaken by Roland Barth on collegiality Peter Salovey on emotional intelligence and Peter Senge on the learning organization Achieving excellence has always been a process Hoerr makes it abundantly clear that the effort to use MI ideas effectively must remain on the agenda Still I can testify that over a 10 year period clear palpable impressive progress can be made We can improve schools significantly but only if we take the long view and do not settle for patchwork fixes Note This product listing is for the Adobe Acrobat PDF version of the book
